CONTOUR MAP OF THE BEDROCK SURFACE,
COLLINSVILLE QUADRANGLE,
CONNECTICUT

By
Elkan R. Handman
1970

EXPLANATION

Contours show the altitude of the bedrock surface. The position of the contours is based largely on data from wells and test borings (Randall, 1964) and publications (Stanley, 1964) and on preliminary knowledge of the geologic history of the region.

The map shows the configuration of the bedrock surface if all unconsolidated earth materials were removed.

CONTOURS. In feet above mean sea level. Rapids show closed depressions. Contour interval 50 feet (15 meters).
