EXPLANATION

Contour map of the bedrock surface. The position of the contours is based on interpretation of aerial photographs (Bingham and others, 1975; Masaferro, 1975) and the published geologic map (Bingham, 1968) supplemented by knowledge of the geologic history of the region.

The map shows the configuration of the bedrock surface if all unconsolidated earth materials were removed.

298

CONTOUR, 10 feet above mean sea level. Ridges show closed depressions. Contour interval 50 feet (15 meters).
