

**RELIABILITY DIAGRAM - SHEET 2**  
The degree of assurance that faults shown on map do exist, that important existing faults are not omitted, and that available geologic control on age of latest movement is properly depicted for each fault is indicated by numbers within area.  
Most reliable 1 - Few additions or modifications likely  
2 - Some additions or modifications likely  
3 - Many additions or modifications likely  
Least reliable 4 - Additions or modifications necessary throughout area

INDEX MAP OF MAJOR FAULTS--SHEET 2

Base from U.S. Geological Survey 1:500,000  
State of California, south half 1970

Scale 1:250,000  
CONTOUR INTERVAL 500 FEET  
BATHYMETRIC CONTOURS IN FATHOMS
