

Base modified from National Oceanic and Atmospheric Administration, 1:250,000 National Ocean Service maps Block Canyon (NJ 19-1, 1978), and Veatch Canyon (NJ 19-2, 1980) Universal Transverse Mercator projection Not to be used for navigational purposes

Isopach map of unit 5W

Base modified from National Oceanic and Atmospheric Administration, 1:250,000 National Ocean Service maps Bear Seamount (NJ 19-3, 1984), Block Canyon (NJ 19-1, 1978), Hydrographer Canyon (NR 19-12, 1978), Lydonia Canyon (NR 19-12, 1978) and Veatch Canyon (NJ 19-2, 1980) Universal Transverse Mercator projection Not to be used for navigational purposes

Isopach map of unit 6W

Base modified from National Oceanic and Atmospheric Administration, 1:250,000 National Ocean Service maps Block Canyon (NJ 19-1, 1978), Hydrographer Canyon (NR 19-12, 1978), and Veatch Canyon (NJ 19-2, 1980) Universal Transverse Mercator projection Not to be used for navigational purposes

Isopach map of unit 7W

- EXPLANATION
- Bathymetric contours—1,000-m interval including the 200-m contour
 - - - RV Columbus Iselin trackline (Cruise C17-78-2, 1978)
 - - - RV James M. Gillis trackline (Cruise GS-7903-3, 1979)
 - - - Multichannel trackline collected by the Bundesanstalt für Geowissenschaften und Rohstoffe (BGR), 1979 (Schlee and Fritsch, 1983)
 - - - Submarine canyon axis
 - Isopach contours in meters—Drawn on USW, U6W, U7W. Contour interval is 20 m. Hachures indicate direction of dip. Contours dashed where control is poor or uncertain

ISOPACH MAPS OF UNITS 5W, 6W, AND 7W
HIGH-RESOLUTION SEISMIC STRATIGRAPHY OF THE UPPER CONTINENTAL RISE SEAWARD OF GEORGES BANK
