U.S. GEOLOGICAL SURVEY

**MAP SHOWING THE DISTRIBUTION OF ANOMALOUS CONCENTRATIONS  
OF MERCURY, ANTIMONY, AND ARSENIC IN STREAM SEDIMENT,  
HEAVY-MINERAL CONCENTRATE, AND AQUATIC MOSS IN THE  
IDITAROD QUADRANGLE, ALASKA**

**By John E. Gray, Peter F. Folger, and Philip L. Hageman**

MISCELLANEOUS FIELD STUDIES MAP  
Published by the U.S. Geological Survey, 1997

ISBN 060788365-0

# INSERT FOR MF-2219-C

Corrections and additions for: U.S. Geological Survey Miscellaneous Field Studies Map MF-2219-C, Map showing the distribution of anomalous concentrations of mercury, antimony, and arsenic in samples of stream sediment, heavy-mineral concentrate, and aquatic moss in the Iditarod quadrangle, Alaska

In the *References* section, the title of Miller and Bundtzen (1994) is incorrect and the correct reference is:

Miller, M.L., and Bundtzen, T.K., 1994, Generalized geologic map of the Iditarod quadrangle, Alaska, showing potassium-argon, major-oxide, trace-element, fossil, paleocurrent, and archaeological sample localities: U.S. Geological Survey Miscellaneous Field Studies Map MF-2219-A, 1 plate, scale 1:250,000, 48 p.

The geologic base for the map and the geologic descriptions in the *Description of Map Units* section are from Miller and Bundtzen (1994).
