

	Conglomerate
	Sandstone, variously bedded
	Siltstone
	Shale
	Oil shale
	Gray or green mudstone
	Red mudstone
	Carbonaceous shale
	Coal
	Limestone
	Algal limestone
	Tuff
	Unconformity
	Freshwater mollusks—Mostly <i>Goniobasis</i> , <i>Viviparus</i> , and <i>Lampsilis</i>
	Contact of stratigraphic unit—Dashed where approximately located
	Lithofacies change
	Correlation of stratigraphic marker bed
	Spontaneous potential curve
	Resistivity curve

Concentration of Inhibitor (M)	Rate of Polymerization (M/min)
0	0.001
1	0.0005
2	0.00025
3	0.000125
4	0.0000625
