SECTION 1. INSTRUMENTATION

The Sedigraph as an Alternative Method to the Pipet--	
O. G. Lara and Wilbur J. Matthes.....	1-1
Development of a Trace Metal P-61 Point-Integrating Sampler--	
Donald A. Benson.....	1-13
Effects of Nozzle Orientation on Sediment Sampling--	
T. A. Winterstein and H. G. Stefan.....	1-20
Continuous Measurement of Suspended-Sediment Concentration--	
John V. Skinner, Joseph P. Beverage and Gerald L. Goddard.....	1-29
Instruments for Measuring Suspended Sediment--	
James H. Ficken.....	1-40
Small Watershed Automatic Water Quality Sampler--	
K. G. Renard, J. R. Simanton and C. E. Fancher.....	1-51
Innovative Techniques for Collecting Hydrologic Data--	
Andrew J. Bowie and Oscar W. Sansom.....	1-59
Suspended Sediment Monitored by Satellite--	
F. R. Schiebe and J. C. Ritchie.....	1-70
Under Water Mapping River Channels and Reservoirs--	
Timothy J. Randle and James O. Blanton, III.....	1-79
