Base from U. S. Geological Survey
 1:1,000,000 scale map of the United States
 now in preparation
 Contours by Frank Leverett

GLACIAL MAP OF SOUTHERN PENINSULA OF MICHIGAN
 By Frank Leverett and Frank B. Taylor
 IN COOPERATION WITH THE GEOLOGICAL SURVEY OF MICHIGAN

Prepared chiefly from original field data
 and from data furnished in reports of the
 Michigan Geological Survey, 1910

NOTE: Some of the 100-foot contours are based on topographic maps of certain quadrangles by the U. S. Geological Survey. Others are less reliable, being based on a combination of railway altitudes or drain levels with aneroid readings.
