

EXPLANATION

FLUORSPAR DEPOSITS

Type of deposit	Greater than 250,000 tons (250,000 metric tons)	Less than 250,000 tons (250,000 metric tons)	50,000-100,000 tons (45,790-90,790 metric tons)	Fluorite occurrences
Vein	●	●	●	x
Stockwork or pipe	▲			x
Dissemination			◆	x

ASSOCIATED METALS OR MINERALS IN MINING DISTRICT—Shown by number of 100 each (north, west, south, or east) on the side of the fluorite deposit symbol.

●	Base metals, precious metals, Bi, or Sb
●	Beril, garnet, or celestine
●	Rare elements (Sn, Be, U, Th, or R₂O₃)
●	Formon metals (Mg, Fe, Mn, or W)
—	FLUORSPAR-BEARING PROMETITE—No known fluorite production
○	TOPAZ OCCURRENCE—Localities not discussed in text
