

2017–2018 Minerals Yearbook

ASIA AND THE PACIFIC

Base modified from ESRI ArcGIS online world countries (generalized) map data, 2017
 Mercator Auxiliary Sphere projection
 World Geodetic System 1984 datum

Figure 1. Map of the Asia and the Pacific region. The countries covered in this report are labeled on the map; bordering countries are shown in gray and not labeled.

THE MINERAL INDUSTRIES OF ASIA AND THE PACIFIC

By Karine M. Renaud, Keita F. DeCarlo, Jaewon Chung, Ji Won Moon,
Sean Xun, and Spencer D. Buteyn

The countries and dependencies that are covered in this chapter had a combined population of approximately 4.13 billion people, or about 54% of the world's total population, and a land area of 29.96 million square kilometers, or about 20% of the world's land area in 2018 (fig 1; table 1). The gross domestic product (GDP) of the Asia and the Pacific region was \$51.4 trillion, accounting for 40% of the world's real GDP. In 2018, the region's real GDP increased by 5.9% compared with that of 2017 (table 2).

The Asia and the Pacific region accounted for 90% of the world's production of tungsten; 77%, tin (Sn content); 74%, hydraulic cement; 71%, raw steel; 70%, graphite; and 63%, bauxite (not including that of the United States). Some countries of the Asia and the Pacific region were globally significant producers of metals and industrial minerals, and (or) mineral fuels and related materials (fig. 2). The major producers of tungsten (W content of mine output) in the region were China (79.2% of the world's output) and Vietnam (5.8%). The major producers of graphite in the region were China (63.0% of the world's output) and India (4.3%). The major producers of hydraulic cement in the region were China (53.3% of the world's output) and India (7.2%). The major producers of raw steel in the region were China (51.3% of the world's output), India (5.9%), Japan (5.8%), and the Republic of Korea (4.0%). The major producers of bauxite in the region were Australia (28.3% of the world's output), China (23.3%), India (6.9%), and Indonesia (3.2%). The major producers of tin (Sn content of mine output) in the region were China (27.9% of the world's output), Indonesia (26.3%), and Burma (16.9%). Data on mineral production for selected mineral commodities, by country in the region, are in table 3.

Acknowledgments

The U.S. Geological Survey acknowledges and expresses its sincere appreciation to the following organizations for

providing mineral production statistics, basic economic data, and exploration and mineral-related information:

- Bangladesh—Bangladesh Bureau of Statistics, National Accounts;
- Burma—Ministry of National Planning and Economic Development, Central Statistical Organization;
- Indonesia—Ministry of Energy & Mineral Resources, Directorate General of Mineral & Coal;
- Japan—Ministry of Economy, Trade and Industry, Research and Statistics Department;
- Malaysia—Ministry of Natural Resources and Environment, Minerals and Geoscience Department;
- Nepal—Ministry of Industry, Commerce and Supplies, Department of Mines and Geology;
- Pakistan—Pakistan Bureau of Statistics, Energy and Mining Statistics Section;
- Papua New Guinea—Mineral Resources Authority of Papua New Guinea, Geological Survey;
- Philippines—Mineral Economics, Information, and Publication Division, Mines and Geosciences Bureau;
- Republic of Korea—Energy & Mineral Resources Strategy Department, Future Policy Division, Korea Institute of Geoscience and Mineral Resources;
- Sri Lanka—Geological Survey and Mines Bureau;
- Taiwan—Bureau of Mines, Ministry of Economic Affairs;
- Thailand—Ministry of Industry, Department of Primary Industries and Mines; and
- Vietnam—Department of Foreign Statistics and International Cooperation, General Statistics Office.

TABLE 1
ASIA AND THE PACIFIC: AREA AND POPULATION IN 2018

Country or territory	Area ¹ (square kilometers)	Estimated population ² (thousands)
Afghanistan	652,230	37,172
Australia	7,741,220	24,983
Bangladesh	148,460	161,356
Bhutan	38,394	754

Share of world total	12.8%	1.0%
World total	31,200,000	55,800

See footnotes at end of table.

ASIA AND THE PACIFIC: PRODUCTION OF SELECTED MINERAL COMMODITIES IN 2018¹

⁶Estimated. NA Not available. W Withheld to avoid disclosing company propriety data. -- Zero or zero percent.

¹Table includes data available through December 20, 2020. All data are reported unless otherwise noted. World totals, U.S. data, and estimated data are rounded to no more than three significant digits; may not add to totals shown. Percentages are calculated using unrounded data.

²Includes secondary production.

³Primary production also includes undifferentiated (primary and secondary) production for some countries listed.

⁴Data are fiscal year

⁵Less than ½ unit.

⁶Although lithium production data may be reported in different forms in the individual country chapters, the data have been converted to lithium carbonate equivalent in this summary chapter.

⁷Less than .05 percent.

⁸Lignite is referred to as bituminous coal in North Korea.

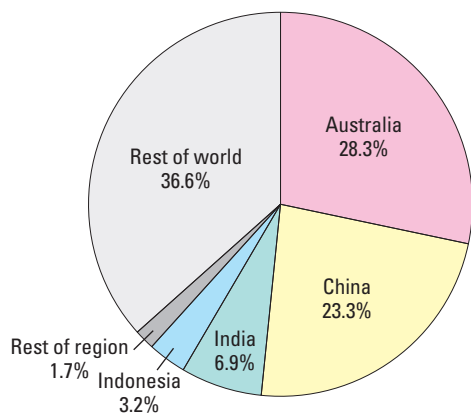

⁹Also contains a minimal amount of undifferentiated anthracite.

Asia and the Pacific region

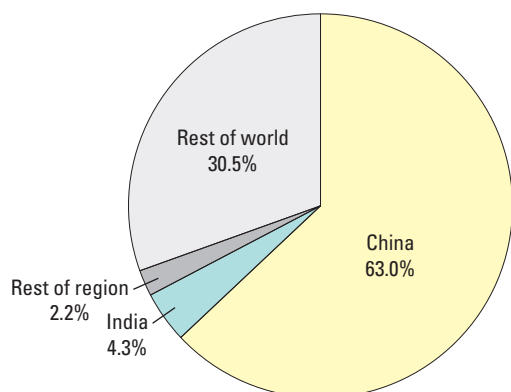

Bauxite

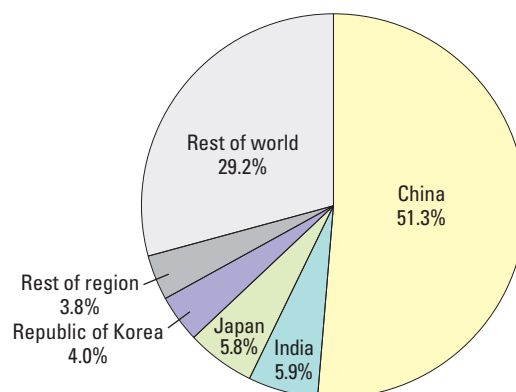

Cement, hydraulic

Graphite

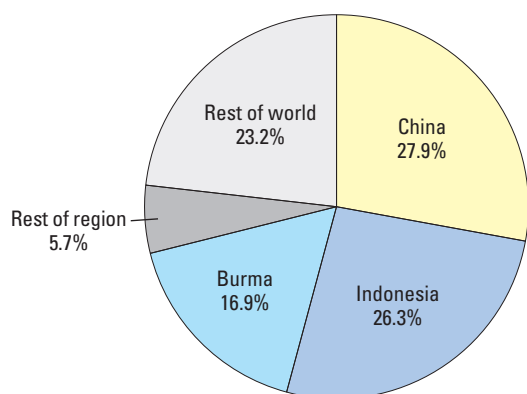

Steel, raw

Tin

(Sn content of mine output)

Tungsten

(W content of mine output)

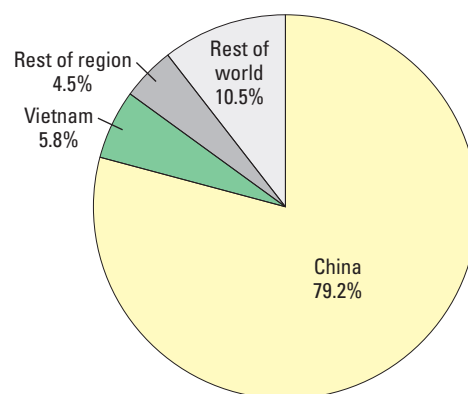

Figure 2. Pie charts showing percentage of world production of selected mineral commodities (bauxite, hydraulic cement, graphite, raw steel, tin, and tungsten) by countries of the Asia and the Pacific region in 2018. Individual countries of the region are labeled if they accounted for at least 3% of world production. Data are from table 3; however, percentages may differ slightly from those shown in table 3 because of independent rounding. Also, percentages may differ from those reported in individual country chapters owing to differences in the source or date of reporting.
