BURKINA FASO [ADVANCE RELEASE]

THE MINERAL INDUSTRY OF BURKINA FASO

By Alberto Alexander Perez

In 2017 and 2018, the production of mineral commodities— notably cement, gold, silver, and zinc—represented only a minor part of the economy of Burkina Faso (International Monetary Fund, 2018, p. 24–25). The legislative framework for the mineral sector in Burkina Faso is provided by the mining code (law No. 036–2015/CNT). Data on mineral production are in table 1. Table 2 is a list of major mineral industry facilities. More-extensive coverage of the mineral industry of Burkina Faso can be found in previous editions of the U.S. Geological Survey Minerals Yearbook, volume III,

Area Reports—International—Africa and the Middle East, which are available at <https://www.usgs.gov/centers/nmic/africa-and-middle-east>.
