PAPUA NEW GUINEA

THE MINERAL INDUSTRY OF PAPUA NEW GUINEA

By Spencer D. Buteyn

In 2017 and 2018, the economy of Papua New Guinea was largely dependent on world demand for the country's principal mineral export commodities, notably cobalt, copper, gold, and nickel (Bank of Papua New Guinea, 2019, p. 15–17). In 2017 and 2018, the country was the 8th ranked producer of cobalt and the 14th- and 15th ranked producer, respectively, of gold in the world (George, 2019, 2020; Shedd, 2019, 2020). The legislative framework for the mineral sector in Papua New Guinea was provided by the Mining Act 1992, the Kumul Consolidated Holdings (Amendment) Act 2015, and the Mineral Resources Authority Act 2005. Data on mineral production are in table 1. Table 2 is a list of major mineral industry facilities. More-extensive coverage of the mineral industry of Papua New Guinea can be found in previous editions of the U.S. Geological Survey Minerals Yearbook, volume III, Area Reports—

International—Asia and the Pacific, which are available at <https://www.usgs.gov/centers/nmic/asia-and-pacific>.
