

2019 Minerals Yearbook

ASIA AND THE PACIFIC [ADVANCE RELEASE]

Base modified from ESRI ArcGIS online world countries (generalized) map data, 2017
 Mercator Auxiliary Sphere projection
 World Geodetic System 1984 datum

Figure 1. Map of the Asia and the Pacific region. The countries covered in this report are labeled on the map; bordering countries are shown in gray and not labeled.

THE MINERAL INDUSTRIES OF ASIA AND THE PACIFIC

By Jaewon Chung, Spencer D. Buteyn, Keita F. DeCarlo, Ji Won Moon,
Karine M. Renaud, and Sean Xun

The countries and dependencies that are covered in this chapter have a combined population of approximately 4.17 billion people and a land area of 29.93 million square kilometers (fig. 1, table 1). In 2019, the gross domestic product (GDP) based on purchasing power parity of the Asia and the Pacific region was \$54.8 trillion, accounting for 40.6% of the world's GDP. The region's real GDP increased by 4.8% compared with that in 2018 (table 2).

The Asia and the Pacific region accounted for 91.5% of the world's production of tungsten (mine output); 77.1%, graphite; 75.7%, hydraulic cement; 75.1%, tin (mine output); 72.1%, raw steel; and 62.5%, bauxite (not including that of the United States) (fig. 2). Some countries of the Asia and the Pacific region were globally significant producers of metals, industrial minerals, and (or) mineral fuels and related materials. The major producers of tungsten in the region were China (82.3% of the world's output) and Vietnam (5.4%) (fig. 2). The major producer of graphite in the region was China (73.5%). The major producers of hydraulic cement in the region were China (56.0%) and India (8.0%). The major producers of mined tin in the region were China (28.6%), Indonesia (26.3%), and Burma (14.2%). The major producers of raw steel in the region were China (53.0%), India (5.9%), Japan (5.3%), and the Republic of Korea (3.8%). The major producers of bauxite in the region were Australia (30.0%), China (19.9%), India (6.3%), and Indonesia (4.7%). Data on mineral production for selected mineral commodities, by country in the region, are in table 3.

Acknowledgments

The U.S. Geological Survey acknowledges and expresses its sincere appreciation to the following organizations for

providing mineral production statistics, basic economic data, and exploration and mineral-related information:

- Bangladesh—Bangladesh Bureau of Statistics;
- Burma—Central Statistical Organization, Ministry of National Planning and Economic Development;
- Indonesia—Directorate General of Mineral & Coal, Ministry of Energy & Mineral Resources;
- Japan—Research and Statistics Department, Ministry of Economy, Trade and Industry;
- Korea, Republic of—Korea Institute of Geoscience and Mineral Resources;
- Malaysia—Minerals and Geoscience Department, Ministry of Natural Resources and Environment;
- Nepal—Department of Mines and Geology, Ministry of Industry, Commerce and Supplies;
- Pakistan—Energy and Mining Statistics Section, Pakistan Bureau of Statistics;
- Papua New Guinea—Geological Survey, Mineral Resources Authority of Papua New Guinea;
- Philippines—Mineral Economics, Information, and Publication Division, Mines and Geosciences Bureau;
- Sri Lanka—Geological Survey and Mines Bureau;
- Taiwan—Bureau of Mines, Ministry of Economic Affairs;
- Thailand—Department of Primary Industries and Mines, Ministry of Industry; and
- Vietnam—Department of Foreign Statistics and International Cooperation, General Statistics Office.

TABLE 1
ASIA AND THE PACIFIC: AREA AND POPULATION IN 2019

| Country or territory | Area ¹ (square kilometers) | Estimated population ² (thousands) |
|----------------------|--|--|
| Afghanistan | 652,230 | 38,042 |
| Australia | 7,741,220 | 25,366 |
| Bangladesh | 148,460 | 163,046 |
| Bhutan | 38,394 | 763 |
| Brunei | 5,765 | 433 |
| Burma | 676,578 | 54,045 |
| Cambodia | 181,035 | 16,487 |
| China | 9,596,960 ³ | 1,397,715 |

See footnotes at end of table.

TABLE 3—Continued
ASIA AND THE PACIFIC: PRODUCTION OF SELECTED MINERAL COMMODITIES IN 2019¹

⁸Estimated. NA Not available. W Withheld to avoid disclosing company propriety data. -- Zero or zero percent.

¹Table includes data available through June 27, 2022. All data are reported unless otherwise noted. World totals, U.S. data, and estimated data are rounded to no more than three significant digits; may not add to totals shown.

²Some countries include secondary production.

³Includes or excludes mine output in solvent extraction process for some countries listed.

⁴Primary production also includes undifferentiated (primary and secondary) production for some countries listed.

⁵Less than ½ unit.

⁶Includes leucoxene.

⁷Less than .05 percent.

⁸Individual country chapters may report lithium production in different forms; original data were converted to lithium carbonate equivalent as shown in this table.

⁹Lignite is referred to as bituminous coal in North Korea.

¹⁰Source: U.S. Energy Information Administration.

¹¹Also contains a minimum amount of undifferentiated anthracite.

¹²Source: World Nuclear Association.

Asia and the Pacific region

Bauxite

Cement, hydraulic

Graphite

Steel, raw

Tin

(Sn content of mine output)

Tungsten

(W content of mine output)

Figure 2. Pie charts showing percentage of world production of selected mineral commodities (bauxite, hydraulic cement, graphite, raw steel, tin, and tungsten) by countries of the Asia and the Pacific region in 2019. Individual countries of the region are labeled if they accounted for at least 3% of world production. All data are from table 3; however, percentages may differ slightly from those shown in table 3 because of independent rounding, and some may not add to 100%. Also, percentages may differ from those reported in individual country chapters owing to differences in the source or date of reporting.
