FIJI [ADVANCE RELEASE]

THE MINERAL INDUSTRY OF FIJI

By Spencer D. Buteyn

In 2019, the production of mineral commodities—notably cement, gold, and silver—represented a minor part of the economy of Fiji (Fiji Bureau of Statistics, 2020a, b). The legislative framework for the mineral sector in Fiji is provided by the Mining Act, the Oil and Petroleum Act, the Quarry Act, the Surveyors Act, the Land Use Decree 2010, the Land Use Regulations, and the Environment Management Act. Data on mineral production are in table 1. Table 2 is a list of major mineral industry facilities. More-extensive coverage of the mineral industry of Fiji can be found in previous editions of the U.S. Geological Survey Minerals Yearbook, volume III, Area Reports—International—Asia and the Pacific, which are available at https://www.usgs.gov/centers/nmic/asia-and-pacific.
