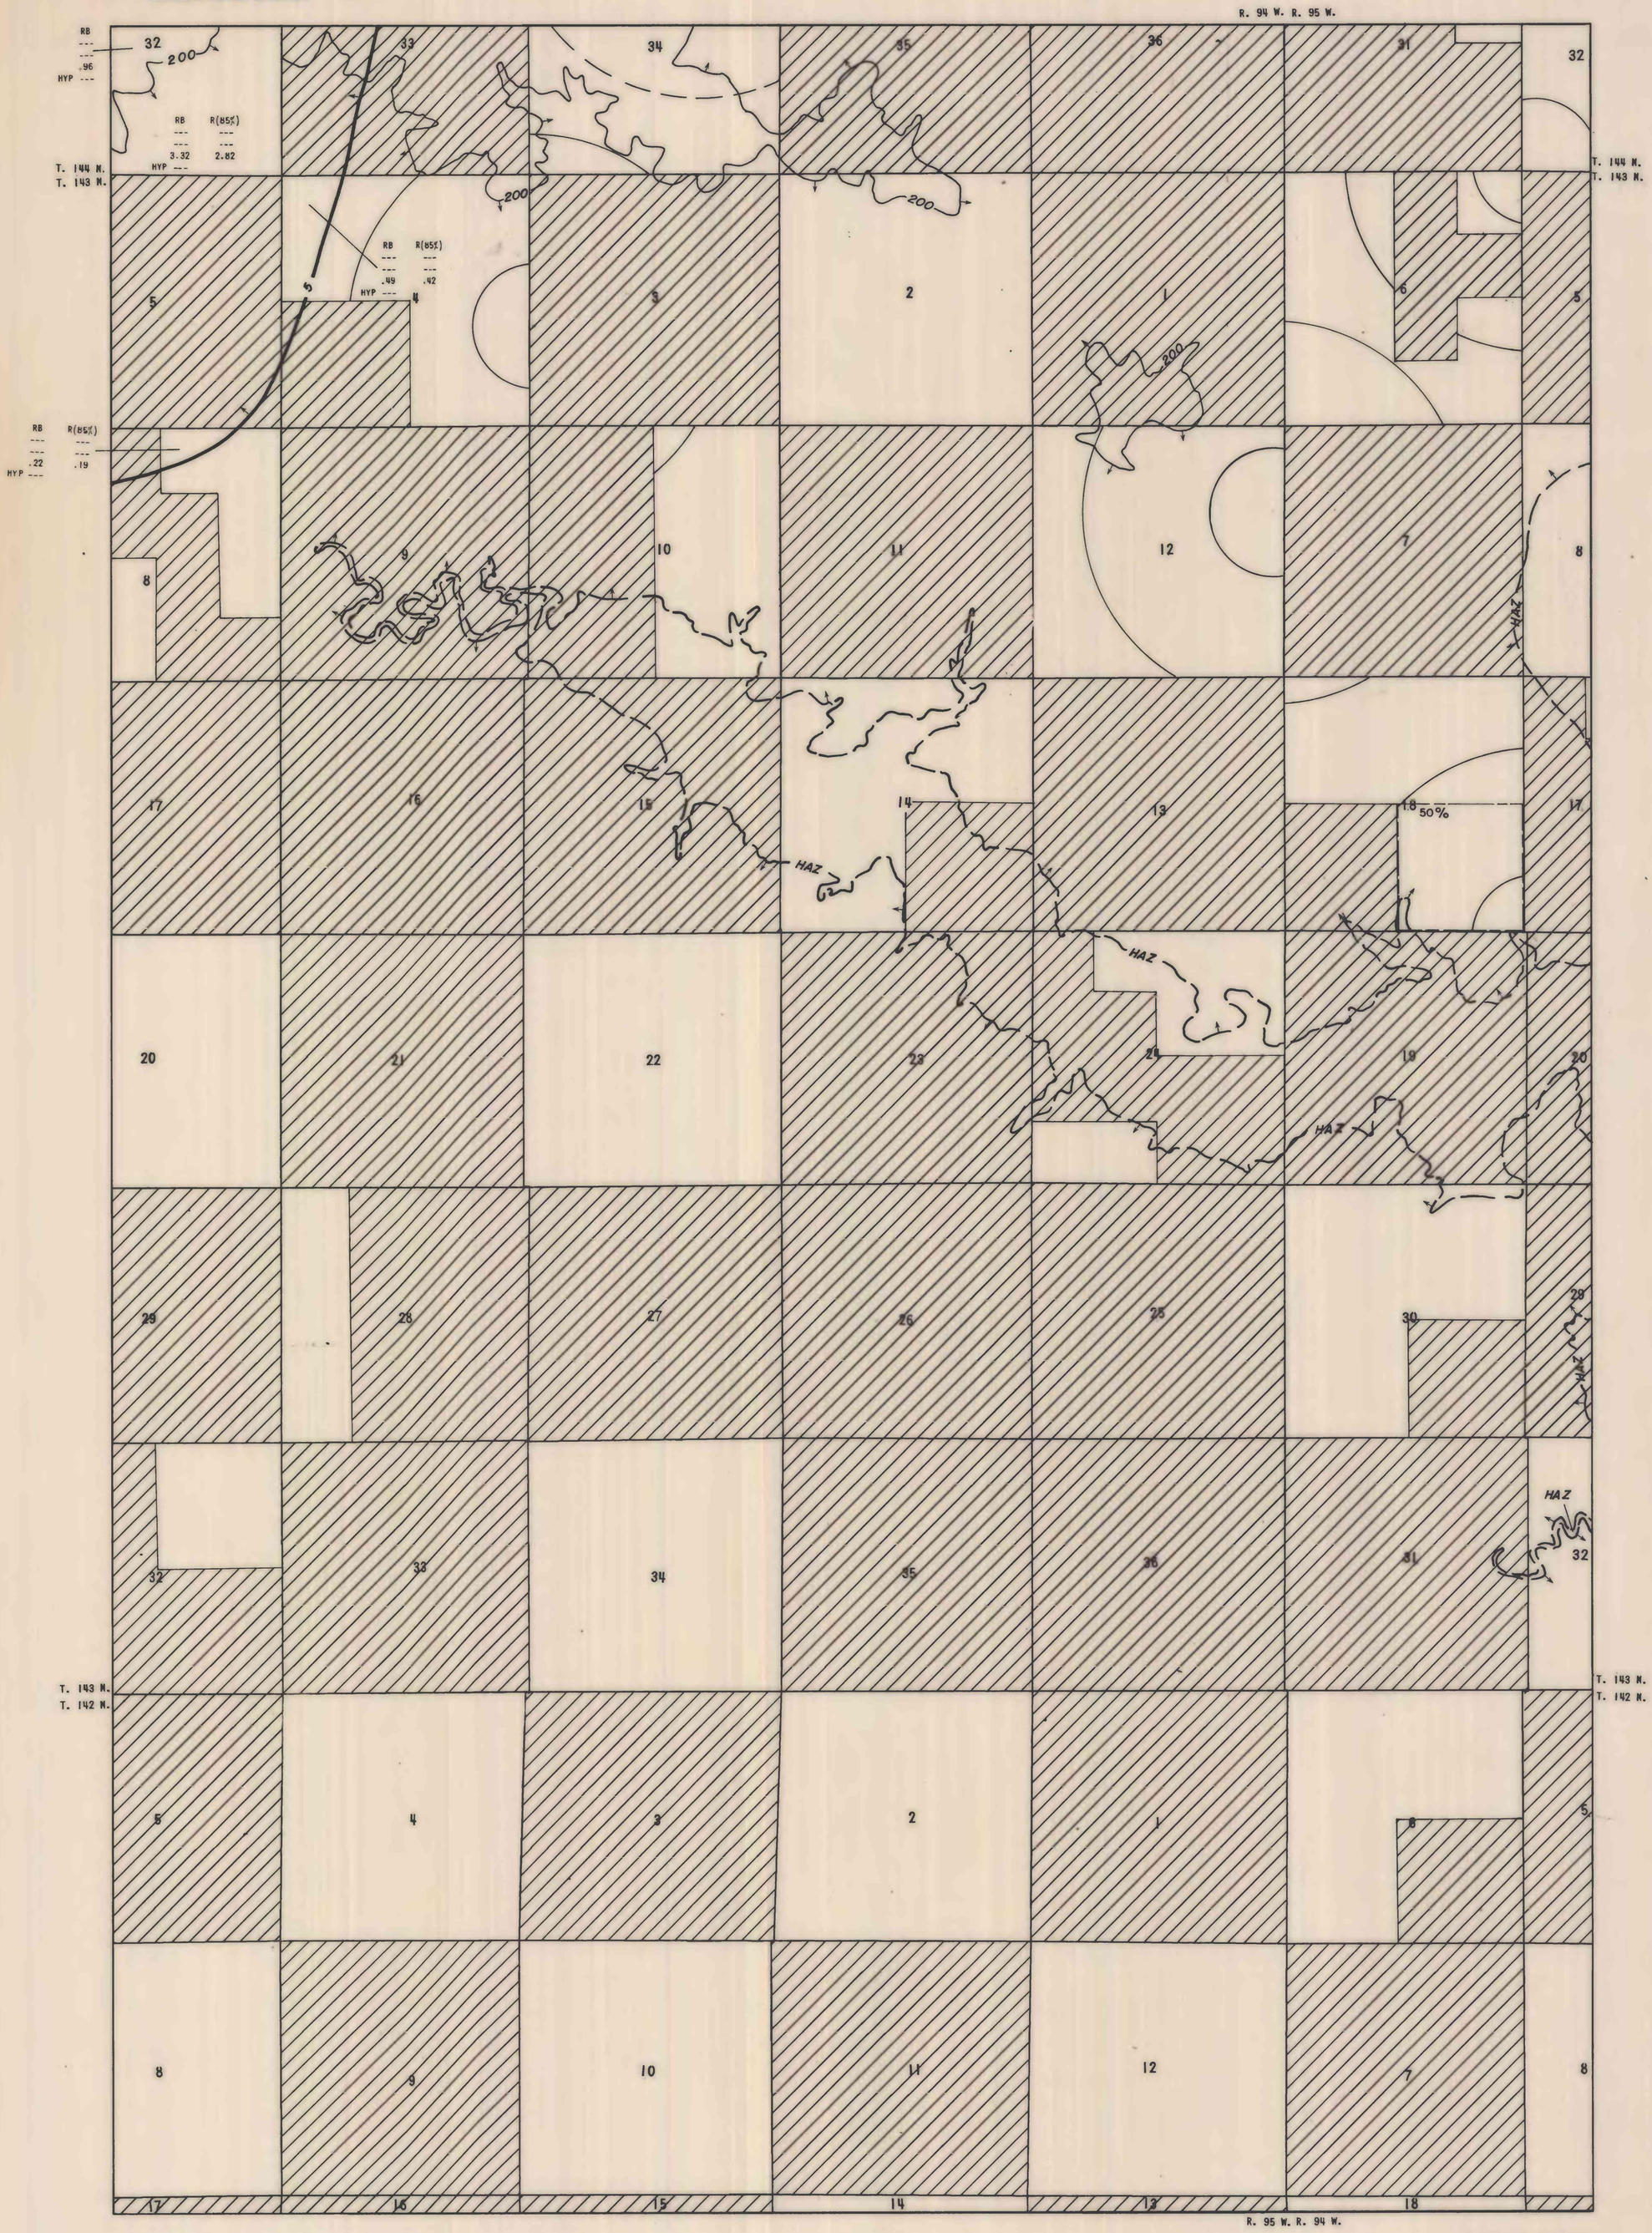
OPEN FILE REPORT 78-069

PLATE 9 OF 13

This report has not been edited for conformity with U.S. Geological Survey editorial standards or stratigraphic nomenclature.



EXPLANATION

NON-FEDERAL COAL LAND--Land for which the Federal Government does not own the coal rights.

50 %

RESTRICTED FEDERAL COAL RIGHTS--Showing the percentage of Federal Government ownership.

5

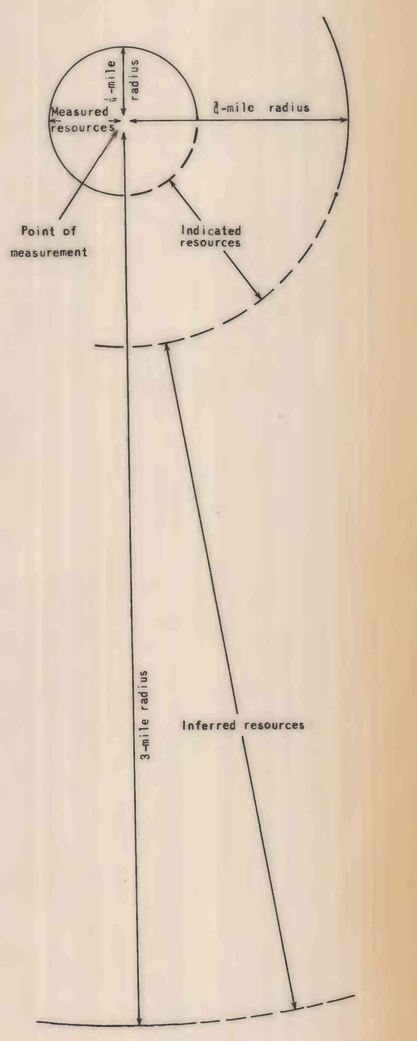
LIMIT OF RESERVE BASE COAL -- 5 coal isopach. Arrow points toward reserve base coal.

200

200-FOOT OVERBURDEN ISOPACH--Used as boundary for surface mining. Arrows point toward area suitable for surface mining.

HAZ

TRACE OF INFERRED COAL BED OUTCROP--Arrow points toward coal bearing area.



BOUNDARY LINES--Showing areas of measured, indicated, inferred, and hypothetical coal reserves. Dashed where projected from adjacent quadrangles.

RB	R(85%)	
4.8	4.1	(Measured resources)
42.4	36.0	(Indicated resources)
65.5	55.7	(Inferred resources)
HYP 1.3		(Hypothetical resources)

IDENTIFIED AND HYPOTHETICAL COAL RESOURCES—Showing totals for Reserve Base (RB) and, in areas suitable for surface mining, Reserves (R), in millions of short tons by section. Dash indicated no resources in that category. Reserve Base (RB) x Recovery Factor (85%) = Reserves (R).

Recovery factors have not been established for underground development of the coal in this quadrangle. Therefore, Reserves (R) were not calculated in areas where the overburden thickness exceeds 200 feet.

To convert short tons to metric tons, multiply short tons by 0.9072.
