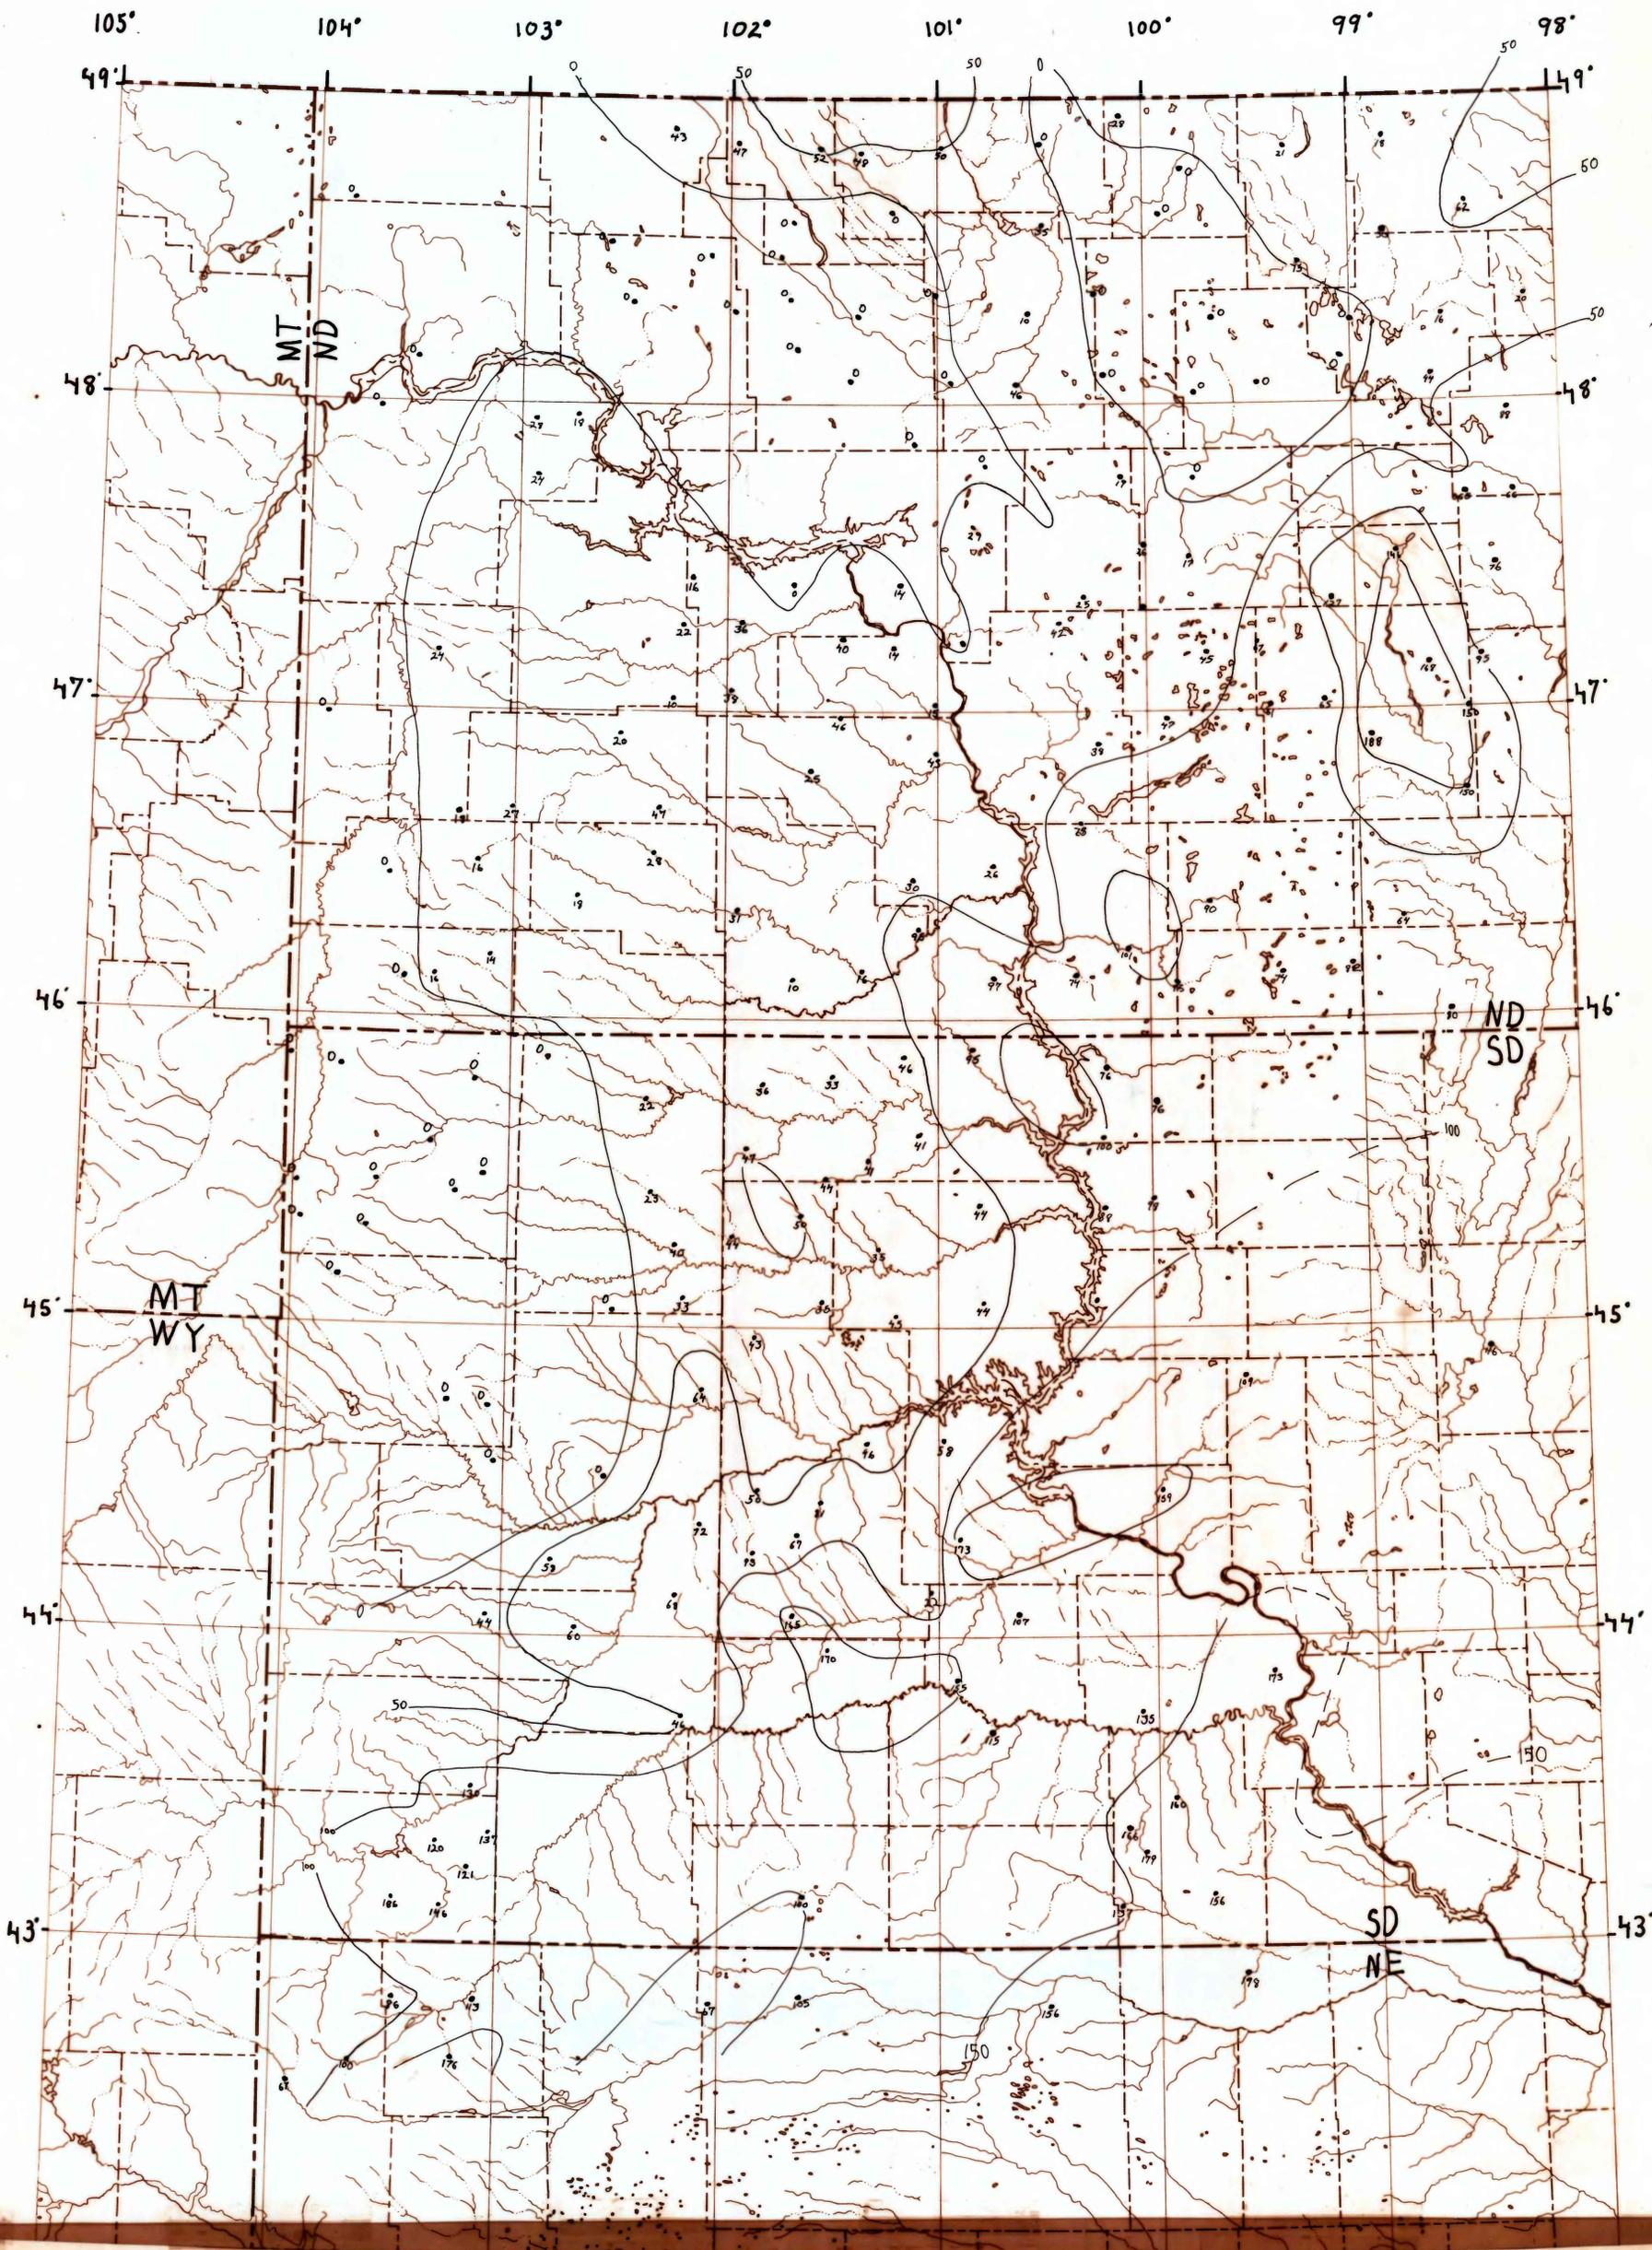

PLATE 5.--Net thickness of massive chalk in Niobrara Formation

by
George W. Shurr
and
Jayne L. Steverding
1980

EXPLANATION

- 100 CONTOUR--Showing net thickness, in feet, of massive chalk in Niobrara Formation. Contour interval equals 50 feet. To convert feet to meters multiply value in feet by 0.3048
- 105 DRILL HOLE--Showing net thickness, in feet, of massive chalk. Cumulative where more than one tongue is present (see plate 4)
