GEOLOGICAL SURVEY

Summary

Astrogeologist Michael Carr narrates this 29-minute videotape program about the possibility of life on the planet Mars, and the critical role that water plays in the prospects for life on the "Red Planet". Dr. Carr's discussion is supplemented with photos, slides, and drawings of Mars, as well as graphic overlays and computer animations created on a Macintosh computer.

The videotape was recorded and edited in 3/4-inch, U-Matic format, and transferred to a 1-inch Duplication Master for distribution.
