

EXPLANATION

.....
Outcrop of vein zone

- - - 1300 - - -
Structure contour on top of vein zone based on geologic mapping in Eureka mine

- - - 1600 - - -
Structure contour on top of vein zone based on data from drill holes and top of stopes as shown on old sections.

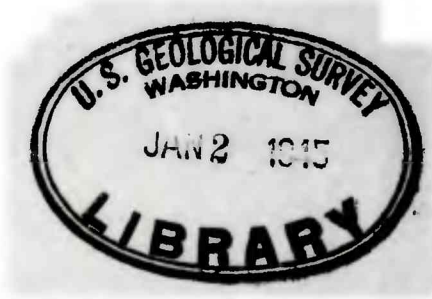

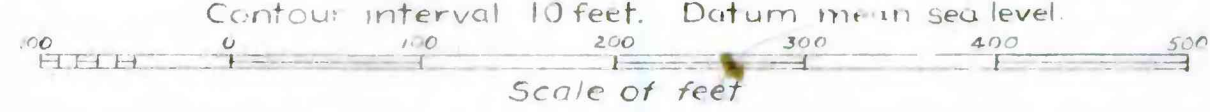

EU-6 ○
Bureau of Mines drill hole
^ denotes intersection of hole with top of vein zone. EU-2 drilled at -60', all others at -80'

P-8 ○
Old drill holes (1916-17)
^ denotes intersection of hole with top of vein zone. All holes drilled at -60'

Topography by J.H. Eric and I.G. Sohn. Southeast quarter and underground workings from old plans.

STRUCTURE CONTOUR MAP OF VEIN ZONE, PIKE HILL MINES, CORINTH, VT.

Contours based on examination of accessible workings, old mine plans and sections, and data from drill holes.

Vermont (Orange Co. copper district). Geol. U.S. 1944.
