

● DRILL HOLE 36-A

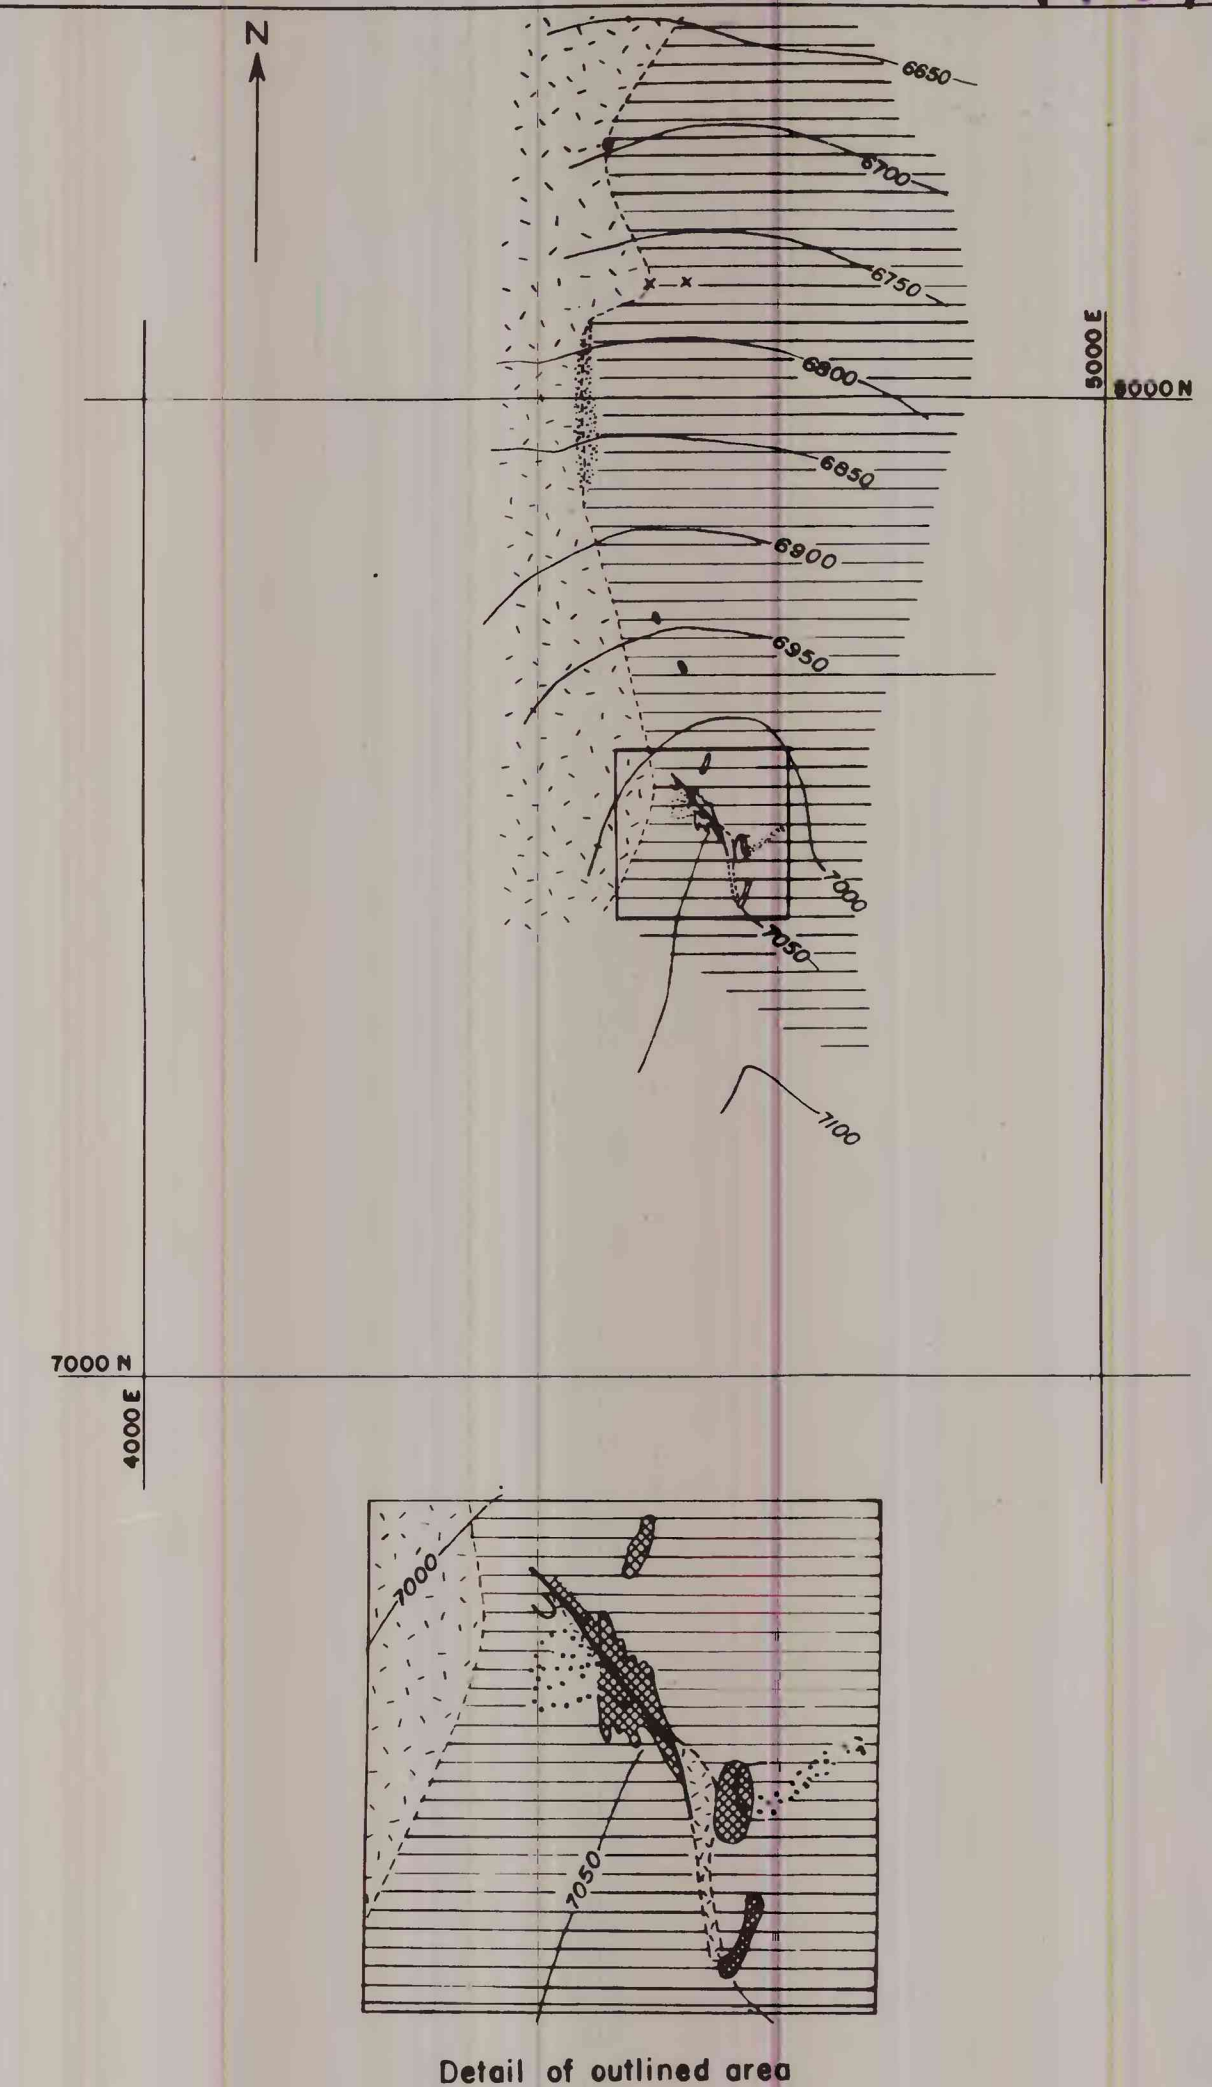

## EXPLANATION

- Quartz monzonite and aplite
- Marble and hornfels including small non-commercial streaks of tactite ore
- Scheelite-bearing tactite (In sections only)
- Tactite ore: concentration of dots shows approximate grade between 0.1 and 2.5%  $WO_3$
- Fault, showing dip, dashed where inferred
- Strike and dip of beds
- Drill hole in plane of section
- Drill hole, projected

DDH. 35-A AND 36-A STAR TUNGSTEN MINE  
HARRISON PASS, ELKO COUNTY, NEVADA

WORKINGS AT DRILL HOLE 36-A  
(SOUTH ORE BODY)

## EXPLANATION

- Quartz monzonite
- Hornfels
- Scheelite-bearing tactite
- Scheelite-bearing float
- Contact, dashed where inferred
- Cut
- Pit
