Figure 6
SECTIONS THROUGH DRILL HOLES INCLINED BELOW 300-LEVEL
Sarlak Mine, Prince of Wales Island, southeastern Alaska

EXPLANATION

1. Cobalt ore
2. Pyrite ore from 0.25% of copper
3. Intersect limit of ore bodies based on drill hole data and mine exposures

EXPLANATION

1. Cobalt ore
2. Pyrite ore from 0.25% of copper
3. Intersect limit of ore bodies based on drill hole data and mine exposures

Altitude of 300-level is 100 feet above approximate high tide

GEOLOGY by R.R. Gott, C.G. Matthes, and D.T. Brodie 1961-62
