

**LEGEND**

- |  |   |  |                                    |
|--|---|--|------------------------------------|
|  | Silicified breccia (potential ore)  |  | Accurate geologic contact.         |
|  | Hydrothermally altered porphyry and diorite(?) (potential ore - not as favorable as silicified breccia) |  | Assumed geologic contact.          |
|  | Diorite(?)  |  | Gradational geologic contact       |
|  | Granodiorite porphyry   |  | Trail                              |
|  | Quartzite   |  | Road                               |
|  |   |  | C.A. Diamond drill hole.           |
|  |   |  | Plane Table station with elevation |
|  |   |  | Dump                               |
|  |   |  | Cross section                      |
|  |   |  | Shaft                              |

U.S. DEPARTMENT OF INTERIOR  
 GEOLOGICAL SURVEY

AMARGOSA MOLYBDENUM AND COPPER CORP.  
**COPEROS GULCH**  
 Esperanza Claims  
 Pima Mining District, Pima County, Arizona  
 May 1943

Scale: 1/1200

Contour interval 20 feet  
 Datum based on U.S.G.S. Twin Buttes Quadrangle

Topography by  
 Donald H. Kupfer
