Note: Water levels are readings taken during last week of month indicated. Readings listed for June are for the 30th except those marked with ^a.

^c Water-level readings taken during last week in June 1947.

^b Well in franchise area of the New York Water Service Corporation.

^e Water level determined from hydrograph.

^f Water level determined from profile plottings.

^g Recoveries computed on basis of 12-hour static (approximately) measured on June 30, except for well K 1351 for which the static on July 1 was used.

^h Water levels affected by pumping in vicinity.

ⁱ Well idle before shutdown in June 1947.

^j Well pumped before shutdown.

^k Water level from continuous-automatic recorder.

Observations made at approximately
mid-month

Note. Water-level readings taken during last week of month indicated. Readings listed for June are for the 30th, except those marked with "c".

It is suggested that footnotes refer to marks (which are to be placed next to item they concern) be of same general classification, if possible, rather than a mixture of characters, and intersperse symbols "NP" and "P" properly below under a descriptive heading, as distinguished from footnote references.
