

Lineation shown by 23 random measurements of oriented elongate minerals and minor fold axes. Contours on 5, 10, 20, and 30 percent concentrations per 1 percent of the area. Plotted on a Schmidt net.

LINEATION IN HORNBLLENDE-BIOTITE GNEISS AND MYLONITE GNEISS

Lineation shown by boudins and minor fold axes; 3 measurements plotted on a Schmidt net.

LINEATION IN RHEOMORPHIC QUARTZ MONZONITE GNEISS
