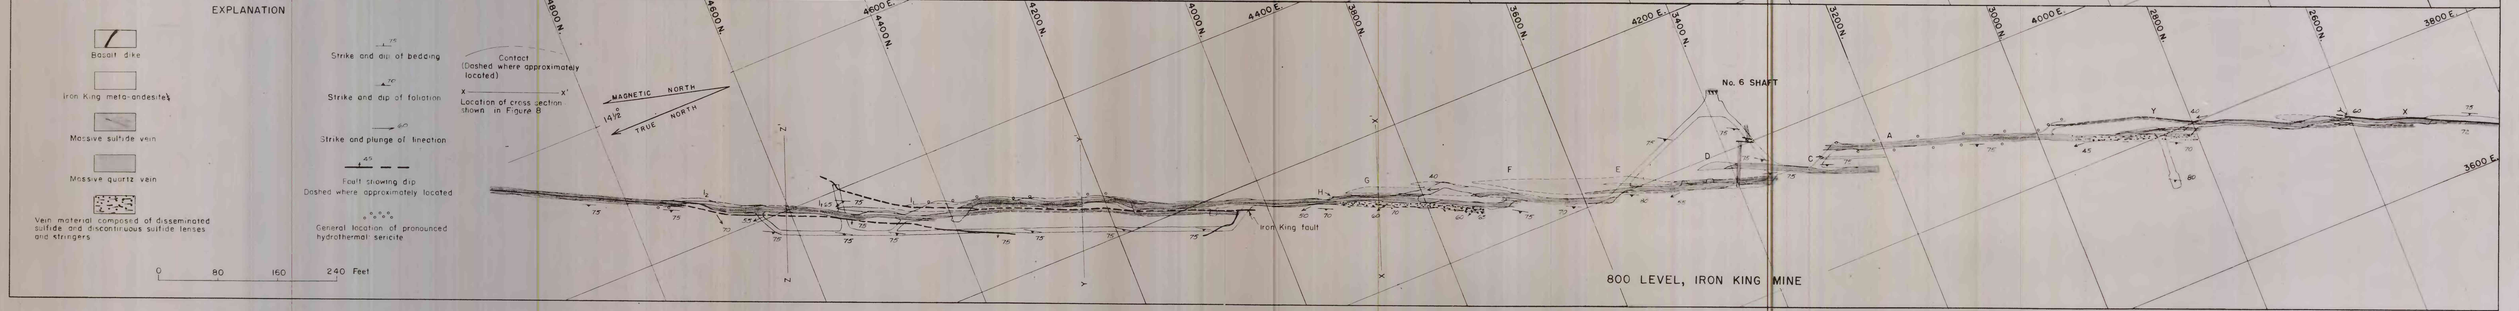
700 LEVEL, IRON KING MINE



EXPLANATION
Basalt dike
Iron King meta-andesite
Massive sulfide vein
Massive quartz vein
Vein material composed of disseminated sulfide and discontinuous sulfide lenses and stringers
Strike and dip of bedding
Strike and dip of foliation
Strike and plunge of lineation
Fault showing dip
Dashed where approximately located
General location of pronounced hydrothermal sericite
Contact
(Dashed where approximately located)
Location of cross section shown in Figure 8
