

(200)  
R290  
no. 192  
Sect. 15

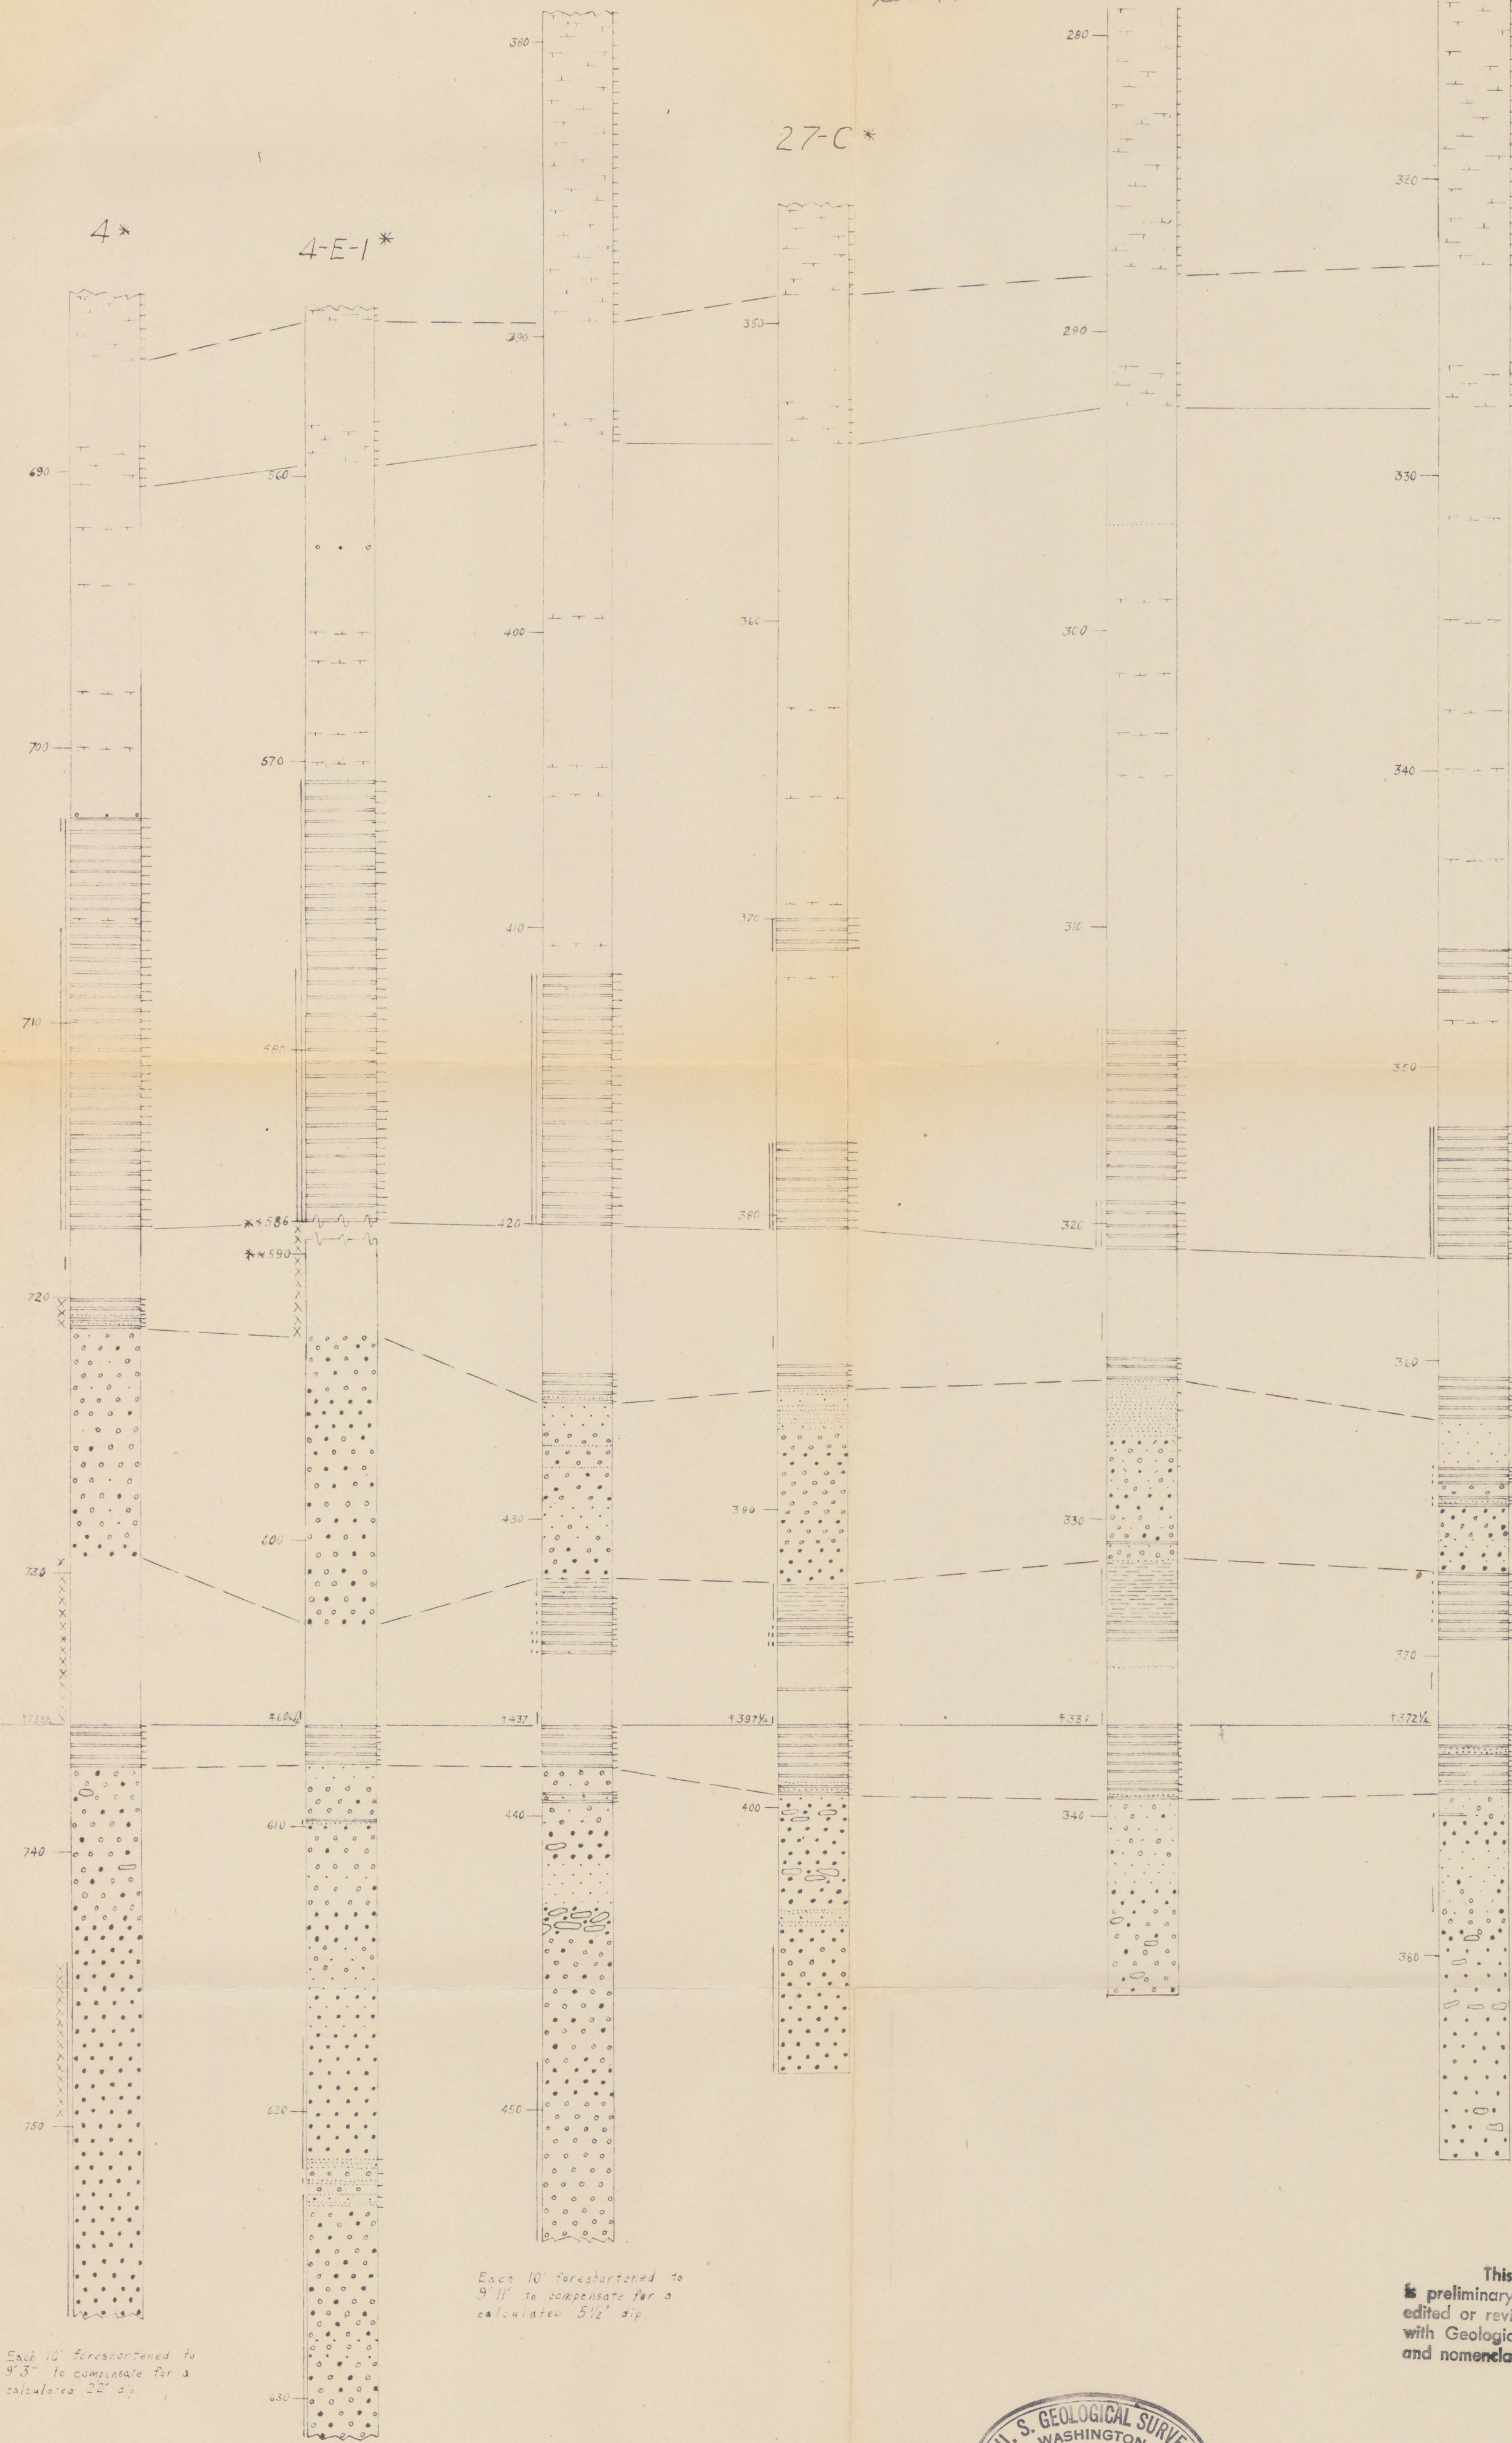

28-D

29-E

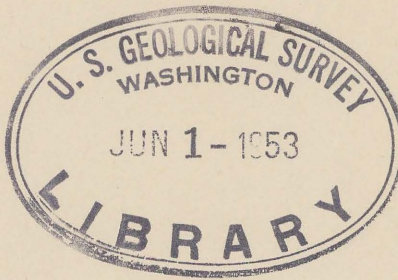

27-C\*

4\*

4-E-1\*

This map or illustration  
is preliminary and has not been  
edited or reviewed for conformity  
with Geological Survey standards  
and nomenclature.

\*\*Stratigraphic sequence and  
lost core (only 57% recovery  
586-593) suggest probable  
restitution by thrust faulting  
of about three stratigraphic  
feet.

\*The distances from 4 to 4-E-1, and from 4-E-3 to 27-C are each approximately  
400'; the same are scaled at greater intervals to allow space for all data.
