

EXPLANATION

Base map compiled by U.S. Geological Survey from  
vertical aerial photographs.  
The aerial photographs used for photogeologic interpretation were  
taken in June 1948.

This map is preliminary and has not been  
edited or reviewed for conformity with  
U. S. Geological Survey standards and  
nomenclature.

STRAIGHT CLIFFS  
QUADRANGLE

PHOTOGEOLOGY BY B. H. KENT  
SCALE 1:24,000

JUNE 1954

Roads as classified in this map series are as follows:  
Primary roads are numbered and graded, traversable by  
two-wheel-drive vehicles; secondary roads are traversable  
possibly by two-wheel-drive vehicles; trails are not  
traversable by four-wheel-drive vehicles; roads, locally.  
When other information is lacking, roads are classified  
by their appearance on aerial photographs.

Stratigraphic column for this area modified from U.S. Geol.  
Survey Prof. Paper 64, 1937. Geographic and geologic  
field data also from Prof. Paper 164.  
Maps of this series have been compiled mainly from photo-  
geologic data but have not been checked in the field, hence  
they have not had the benefit of thorough evaluation with  
respect to maps compiled entirely from field data.
