

	Hitchcock and others (1861)	Richardson and others (1902, 1906, 1919, 1919b, 1924, 1927)	Perry (1929) Whittle (1894)	Currier and Jahns (1941)	Doll (1945)	Present usage
Middle Ordovician to Devonian(?)	Calciferous-mica schist	Waits River limestone phase (1907) interbedded with Randolph phyllite phase (1925)	Waits River limestone and Randolph phyllite	Waits River formation	Meetinghouse slate (1945)	Meetinghouse slate
					Gile Mountain schist (1945)	Gile Mountain formation
	Clay slate	Memphremagog slate (1907)	Northfield slate (1941)	Northfield formation	Standing Pond amphibolite	Standing Pond amphibolite
		Waits River formation			Waits River formation	
Middle Ordovician(?)		"Irasburg conglomerate"		Shaw Mountain formation (1941)		Shaw Mountain formation
		Missisquoi group (1919, 1923)	Missisquoi group	Cram Hill formation (1941)		Cram Hill formation Moretown formation (Cady, 1956)
	Talcose schist	Bethel schist (1925)	Bethel schist			Stowe formation (Cady, 1956)
Cambrian to Middle Ordovician	clay slate		Ottauquechee phyllite and quartzite (1929)			Ottauquechee formation
	clay slate		Pinney Hollow schist (1929)			Camels Hump group (Cady, 1956) Various subdivisions in different areas shown in table 15
	Talcose schist		Upper quartzite Middle quartzite, dolomite, and conglomerate Albite mica schist Lower quartzite and dolomite	"Older Cambrian rocks"		
	gneiss		Mendon series (1894)			
Precambrian			Mt. Holly series (1894)			Mt. Holly "series" or complex"
