

EXPLANATION

○ 4100

Well for which information was obtained (figures indicate number of wells if more than one in a small area and the altitude of the water level above sea level)

Contour lines on the water table, approximate where dashed

Contour intervals 25, 50, and 100 feet. Datum is mean sea level

Depth to water below land surface, in feet

0-25

25-100

100-200

200-300

300-400

Over 400

Unknown

In some areas, especially near mountain masses, impervious rock may lie at indicated depth to water

Note: From United States Geological Survey Water-Supply Paper 1230, 1954.

Map adapted from Conover (1954, pl. 1)

SOUTHERN JORNADA DEL MUERTO AND MESILLA VALLEY IN THE VICINITY OF LAS CRUCES, DOÑA ANA COUNTY, NEW MEXICO
Contours on the water table, depth to water, and wells for which information was obtained, 1947.
