

EXPLANATION

Boundary of semiconsolidated rocks

Boundary of consolidated rocks

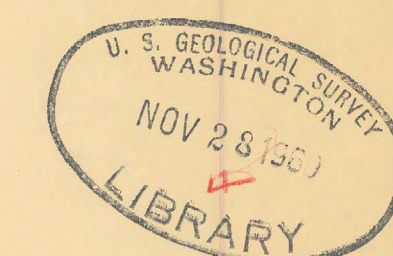

0.4
Line of equal subsidence, in feet, 1957-59. Contour interval 0.2 foot, except 0.1-foot line used to delineate margin of active area

485
Location and anchor depth, in feet, of U.S. Geological Survey compaction recorder

Level net for which U.S. Coast and Geodetic Survey bench-mark control is available

Note: All subsidence data compiled from leveling of U.S. Coast and Geodetic Survey, January-February 1957 and February-April 1959

Prepared in cooperation with the California Department of Water Resources

LAND SUBSIDENCE IN THE ARVIN-MARICOPA AREA OF THE SAN JOAQUIN VALLEY, CALIFORNIA, 1957-59

OPEN FILE

0 2 4 6 8 MILES
Contour interval 100 feet

Base from U.S. Geological Survey topographic quadrangles

Compiled by B. E. Lofgren, 1960

California (Arvin-Maricopa area) Subsidence. 1:125,000. 1960. cop. 1
