

- EXPLANATION**
- Conglomeratic sandstone
 - Sandstone, crossbedded
 - Shaly sandstone
 - Sandy shale
 - Siltstone and shaly siltstone
 - Claystone and shaly clay
 - Carbonaceous material
 - Coal or lignite
 - Bentonitic
 - Poorly exposed
 - Covered
- Numbers of stratigraphic type sections corresponding to localities shown on Figure 2.

Figure 3.-- Correlated stratigraphic sections of Upper Cretaceous and lower Tertiary rocks measured on the eastern side of the San Juan Basin, New Mexico
