

FIGURE 39.—Profile-section of late Quaternary, Bellevue basalt flows and associated sediments across the Bellevue fan divide between the modern Silver Creek and Big Wood River valleys in the Bellevue area (fig. 40, appendix). The section downvalley from the "point of tangency of west profile" is the same as the profile-section of the west outlet valley (fig. 42), and the section downvalley from the "point of tangency of east profile" is the same as the profile-section of the east outlet (Silver Creek) valley (fig. 43). Vertical exaggeration is about 1:40.
