

FIGURE 22.--Periglacial sidestream terraces of small, steep-gradient tributaries and their relationship to the valley floor deposits of the Big Wood River. Postglacial sidestream fan, QRs, rests on Pinedale mainstream outwash; Pinedale sidestream fan, QPs, is graded to Pinedale mainstream outwash surface and is nested in Bull Lake sidestream fan, QBs; both the Pinedale and Bull Lake sidestream fans are truncated by the Big Wood River. Symbols are the same as used on the geologic map (pl. 1).
