Figure 2. Generalized geologic map of part of the Iliamna D-7 quadrangle, Alaska, showing location of magnetite-bearing pyroxenite, and sample locations.

U. S. Geological Survey
OPEN FILE REPORT
This report is preliminary and has not been edited or reviewed for conformity with Geological Survey standards.

EXPLANATION

Quaternary surficial deposits

Tertiary volcanic rocks

Jurassic intrusive rocks
J1, mainly hornblende granodiorite, altered intrusive rock (locally pyritiferous), cut by dikes of Tertiary basalt (Tb)

Plutonic breccia containing magnetite-bearing pyroxenite inclusions

Contact
Indefinite contact
Probable fault
Sample site

Figure 1. Index map.
