[Reports - Open file series]

For release Dec. 2, 1968

The U. S. Geological Survey is releasing in open file the following reports. Copies are available for consultation in the Geological Survey Libraries, 1033 GSA Bldg., Washington, D.C. 20242; Bldg. 25, Federal Center, Denver, Colo. 80225; and 345 Middlefield Rd., Menlo Park, Calif. 94025. Copies are also available for consultation in other offices as listed:

1. Preliminary report on the engineering geology of the Boulder quadrangle, Boulder County, Colorado, by Maxwell E. Gardner. 9 p., plus 3 large sheets of tables, 1 map and explanation (2 sheets), scale 1:24,000. 8102 Federal Office Bldg., Salt Lake City, Utah 84111; 1012 Federal Bldg., Denver, Colo. 80202. Material from which copy can be made at private expense is available at this Denver address.
- ✓ 2. A list of references on lead isotope geochemistry through 1966, by Bruce R. Doe. 97 p. Material from which copy can be made at private expense is available in the USGS Library, Bldg. 25, Federal Center, Denver, Colo. 80225.
3. Feasibility study for an airborne geophysical survey of the Republic of Liberia, by Randolph W. Bromery. 23 p.
4. Summary of mineral resources encountered in Colombia, by C. M. Tschanz, R. B. Hall, T. Feininger, D. Ward, R. Goldsmith, D. H. MacLaughlin, and E. Maughan. 58 p., 6 figs., 5 tables.

U. S. GOVERNMENT PRINTING OFFICE
WASHINGTON, D. C. 20540
1965

The volume No. 1, 1965

The U. S. Geological Survey is pleased to present to you this volume. It contains a selection of the best papers published in the Survey's journals, *Bulletin*, *Professional Paper*, *Water-Supply Paper*, *Technical Note*, and *Open-File Report*. The volume is intended to provide a comprehensive overview of the Survey's activities and achievements during the year 1965.

1. *Geological Survey* is the leading authority on the geology of the United States. It is a part of the Department of the Interior, and its work is directed by the Director, Geological Survey. The Survey's activities are divided into four main areas: *Geology*, *Hydrology*, *Soil Conservation*, and *Land Use*. The Survey's work is carried out through a network of field offices and research centers throughout the United States.

2. A list of the Survey's publications is included in this volume. The list is arranged alphabetically by author. The Survey's publications are available for sale at a special price. The price of the volume is \$1.00. The Survey's publications are also available for sale at a special price to libraries and other institutions.

3. The Survey's work is supported by the Department of the Interior. The Survey's work is also supported by the National Science Foundation, the National Aeronautics and Space Administration, and other federal agencies.

4. The Survey's work is also supported by the private sector. The Survey's work is supported by a number of private organizations, including the American Petroleum Institute, the American Iron and Steel Institute, and the American Coal Institute.

This bibliography was constructed to be as complete as possible for terminal papers containing new data relative to the geochemical applications of

Common lead
U-Th-Pb isotopic dating
Pb- α
Pb²¹⁰, Pb²¹², Pb²¹⁴

No effort was made for completeness of:

Annual reports, Yearbooks, etc.
Review papers

although many are included. Abstracts and theses are omitted.
