BIBLIOGRAPHY OF THE GEOLOGY AND MINERAL INDUSTRY

OF LIBERIA AND ADJACENT COUNTRIES

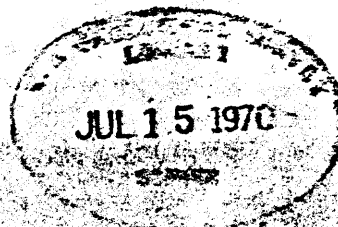

SUPPLEMENT 1

by

Donald H. Johnson

and

Richard W. White

U. S. Geological Survey

**BIBLIOGRAPHY OF THE GEOLOGY AND MINERAL INDUSTRY  
OF LIBERIA AND ADJACENT COUNTRIES**

**SUPPLEMENT I**

by

**Donald H. Johnson and Richard W. White**

**U. S. Geological Survey**

This supplement to the bibliography<sup>1/</sup> released in early 1969 is a continuation and expansion of that list. This supplement lists papers issued after the original bibliography was compiled, as well as earlier-published papers that have come to the attention of the compilers since that time. This bibliography was compiled as a part of the Geological Exploration and Resources Appraisal program, undertaken jointly by the Liberian Geological Survey and the U. S. Geological Survey, sponsored by the Government of Liberia and the U. S. Agency for International Development.

The references in this supplement and in the earlier bibliography have been compiled from many sources, including the U. S. Geological Survey Library in Washington, the Liberian Geological Survey library, various published bibliographies, references cited by authors in publications dealing with Liberian geology and mineral industry, and chance encounters in the literature. The list is admittedly incomplete, and users of the bibliography are requested to call additional references or errors to the attention of the compilers.

References to mining, metallurgy, and mineral economies involving Liberia have been included, as have papers dealing with physical geology, cartography, hydrology, pedology, and related subjects. Because the present knowledge of Liberian geology depends heavily on comparison with other areas, many reports on the geology of countries adjacent to Liberia and the west African region are included.

Because this bibliography has been compiled in part from other bibliographies and authors' citations, and because we have not seen many of the references listed, some of the papers included here may not actually be germane to Liberian geology and mineral industry. All such doubtful references are included so as not to inadvertently omit a useful paper. For similar reasons a number of references are included for

which such information as publisher, volume number, pagination, or date of the publication is lacking.

Publications held in the library of the Liberian Geology Survey in Monrovia are marked by an asterisk. Many of the publications are available in larger geological libraries around the world, but some, particularly unpublished company reports, may not be available except by special arrangement with the company. Efforts are being made to increase the holdings of the Liberian Geological Survey library, and persons are invited to offer publications to the library as gifts, or exchange or purchase.
