

SURFACE BREAKS FORMED AT THE TIME OF AND
FOLLOWING THE BORREGO MOUNTAIN, CALIFORNIA
EARTHQUAKE OF APRIL 8, 1968

Breaks associated with landslides and slumping are not shown

by
US Geological Survey
and
California Institute of Technology

THIS MAP IS A REVISION OF THE
1968 MAP OF THE BORREGO MOUNTAIN
EARTHQUAKE ZONE, WHICH WAS
PUBLISHED BY THE GEOLOGICAL SURVEY

Field mapping done between April 1968
and January 1970. New breaks were still
forming and creep was still occurring
along the main break and other breaks
when this map was compiled.
