Base from U.S. Geological Survey
Romero Canyon, 1961

EXPLANATION

Altitude of water level (in feet) — 4392.14 — Well number 4

Observation well

Spring

4390.27 — Altitude of water level (in feet)

Staff gage

3

Water-quality sampling site and site number

Temporary — X 4404.13 — Altitude, in feet

Bench Mark

4398

Water-table contour
Contour interval 2 feet; datum is mean sea level.

Seepage area

Bluff

Open water

Figure 3.--Map showing location of observation wells, springs, staff gages, water-quality sampling sites, bench marks, and contours on the water table, October 1971, Elephant Butte marsh, New Mexico.
