MADEN

GEOLOGIC MAP OF AREA 1

Scale 1:50,000

EXPLANATION

Ls
Limestone
Qal
Recent alluvium
Cl
Chlorite rock
Serp
Serpentine
di
Basic intrusive complex
Py: pyroxene
m
Mudstone
m-v
Mixed volcanic rock and mudstone
v
Volcanic rocks mostly andesitic in composition

Includes beds of conglomerate, sandstone and limy mudstone, congl. conglomerate ss sandstone
Includes limestone conglomerate and argillaceous limestone arg. argillaceous limestone num. nummulitic limestone bx. limestone breccia congl. limestone conglomerate

Contact of formation
Dashed where approximately located

Fault dashed where inferred, dotted where concealed
Arrows indicate relative movement
T- mark and figure indicate dip
