Prepared in cooperation with the

SAN BENITO COUNTY BOARD OF SUPERVISORS

FIGURE 15

U.S. GEOLOGICAL SURVEY

EXPLANATION

- BOUNDARIES**
- Ground-water subbasin boundary
 - Ground-water subunit boundary - Roman numeral identifies subunit within a subbasin
 - Geohydrologic boundary between consolidated bedrock having low permeabilities and unconsolidated sedimentary rocks having moderate to high permeabilities
 - Waste-disposal site

- WATER SAMPLE** - Number in parentheses indicates year analyzed. Number above line indicates chloride, in milligrams per liter. Number below line indicates depth of lowest perforation or depth of well, in feet below land surface; queried where unknown
- Collected and analyzed in 1968 by U.S. Geological Survey
 - Collected by California Department of Water Resources. Analyses by Department of Water Resources or U.S. Geological Survey
 - Collected by private individual and analyzed by commercial laboratory
 - Inactive salt-water-disposal pit

MAP OF THE HOLLISTER AND SAN JUAN VALLEYS, SAN BENITO COUNTY, CALIFORNIA, SHOWING CONCENTRATIONS OF CHLORIDE IN GROUND-WATER, 1960-68
