PRELIMINARY GEOLOGIC MAP OF THE CROTON 1/4 QUADRANGLE, CAMPBELL COUNTY, WYOMING

By
Evelyn R. Lanis and Philip T. Hayes
1973

EXPLANATION

Tertiary

- Breccia (carbonate-dolomite)—light-colored breccia of carbonate and dolomite, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone)—light-colored breccia of sandstone, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (siltstone)—light-colored breccia of siltstone, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (conglomerate)—light-colored breccia of conglomerate, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and conglomerate)—light-colored breccia of sandstone and conglomerate, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and shale)—light-colored breccia of sandstone and shale, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and siltstone)—light-colored breccia of sandstone and siltstone, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and brine)—light-colored breccia of sandstone and brine, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and coal)—light-colored breccia of sandstone and coal, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and breccia)—light-colored breccia of sandstone and breccia, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and sandstone)—light-colored breccia of sandstone and sandstone, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and shale)—light-colored breccia of sandstone and shale, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and siltstone and coal)—light-colored breccia of sandstone and siltstone and coal, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and brine and coal)—light-colored breccia of sandstone and brine and coal, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and sandstone and coal)—light-colored breccia of sandstone and sandstone and coal, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and breccia and sandstone)—light-colored breccia of sandstone and breccia and sandstone, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and sandstone and breccia)—light-colored breccia of sandstone and sandstone and breccia, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and sandstone and sandstone)—light-colored breccia of sandstone and sandstone and sandstone, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and sandstone and breccia and sandstone)—light-colored breccia of sandstone and sandstone and breccia and sandstone, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and sandstone and sandstone and breccia)—light-colored breccia of sandstone and sandstone and sandstone and breccia, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and sandstone and sandstone and sandstone)—light-colored breccia of sandstone and sandstone and sandstone and sandstone, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and sandstone and sandstone and breccia and sandstone)—light-colored breccia of sandstone and sandstone and sandstone and breccia and sandstone, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and sandstone and sandstone and sandstone and breccia)—light-colored breccia of sandstone and sandstone and sandstone and sandstone and breccia, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and sandstone and sandstone and sandstone and sandstone)—light-colored breccia of sandstone and sandstone and sandstone and sandstone and sandstone, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and sandstone and sandstone and sandstone and sandstone and breccia)—light-colored breccia of sandstone and sandstone and sandstone and sandstone and sandstone and breccia, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and sandstone and sandstone and sandstone and sandstone and sandstone)—light-colored breccia of sandstone and sandstone and sandstone and sandstone and sandstone and sandstone, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and sandstone and sandstone and sandstone and sandstone and sandstone and breccia)—light-colored breccia of sandstone and sandstone and sandstone and sandstone and sandstone and sandstone and breccia, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.

- Breccia (sandstone and sandstone and sandstone and sandstone and sandstone and sandstone and sandstone)—light-colored breccia of sandstone and sandstone and sandstone and sandstone and sandstone and sandstone and sandstone, argillaceous or massive, thickly bedded, contains some coal, brine, and sandstone.
