

120°W - nos Gravity station showing Bouguer anomaly in mgal.
Bouguer reduction density = 2.67 g/cm³
Includes terrain corrections to a distance of 166.7 km
Contour interval is 5 mgal

Preliminary Complete Bouguer Gravity Map of Fresno 1°x2° quadrangle, California

by H. W. Oliver and S. L. Robbins

1974

This map is preliminary and has not been reviewed for conformity with U.S. Geological Survey standards and nomenclature.

Includes data in Owens Valley from USGS Prof. Paper 432 by Pariser and others (1964), and in the San Joaquin Valley by the National Geodetic Survey (O.A. Rice, written commun., 1968).
