

EXPLANATION

PUMPING CENTER

|         |         |         |         |
|---------|---------|---------|---------|
| ○       | ○       | ⊕       | ○       |
| 107     | 80      | 67      | 53      |
| (0.132) | (0.097) | (0.083) | (0.065) |

Withdrawal rates, in acre-feet (cubic hectometres) per year assuming an irrigation requirement of 8 inches (20 centimetres) of water per year. Open circles denote pumping centers in model 1. Crossed circles denote pumping centers in model 2.

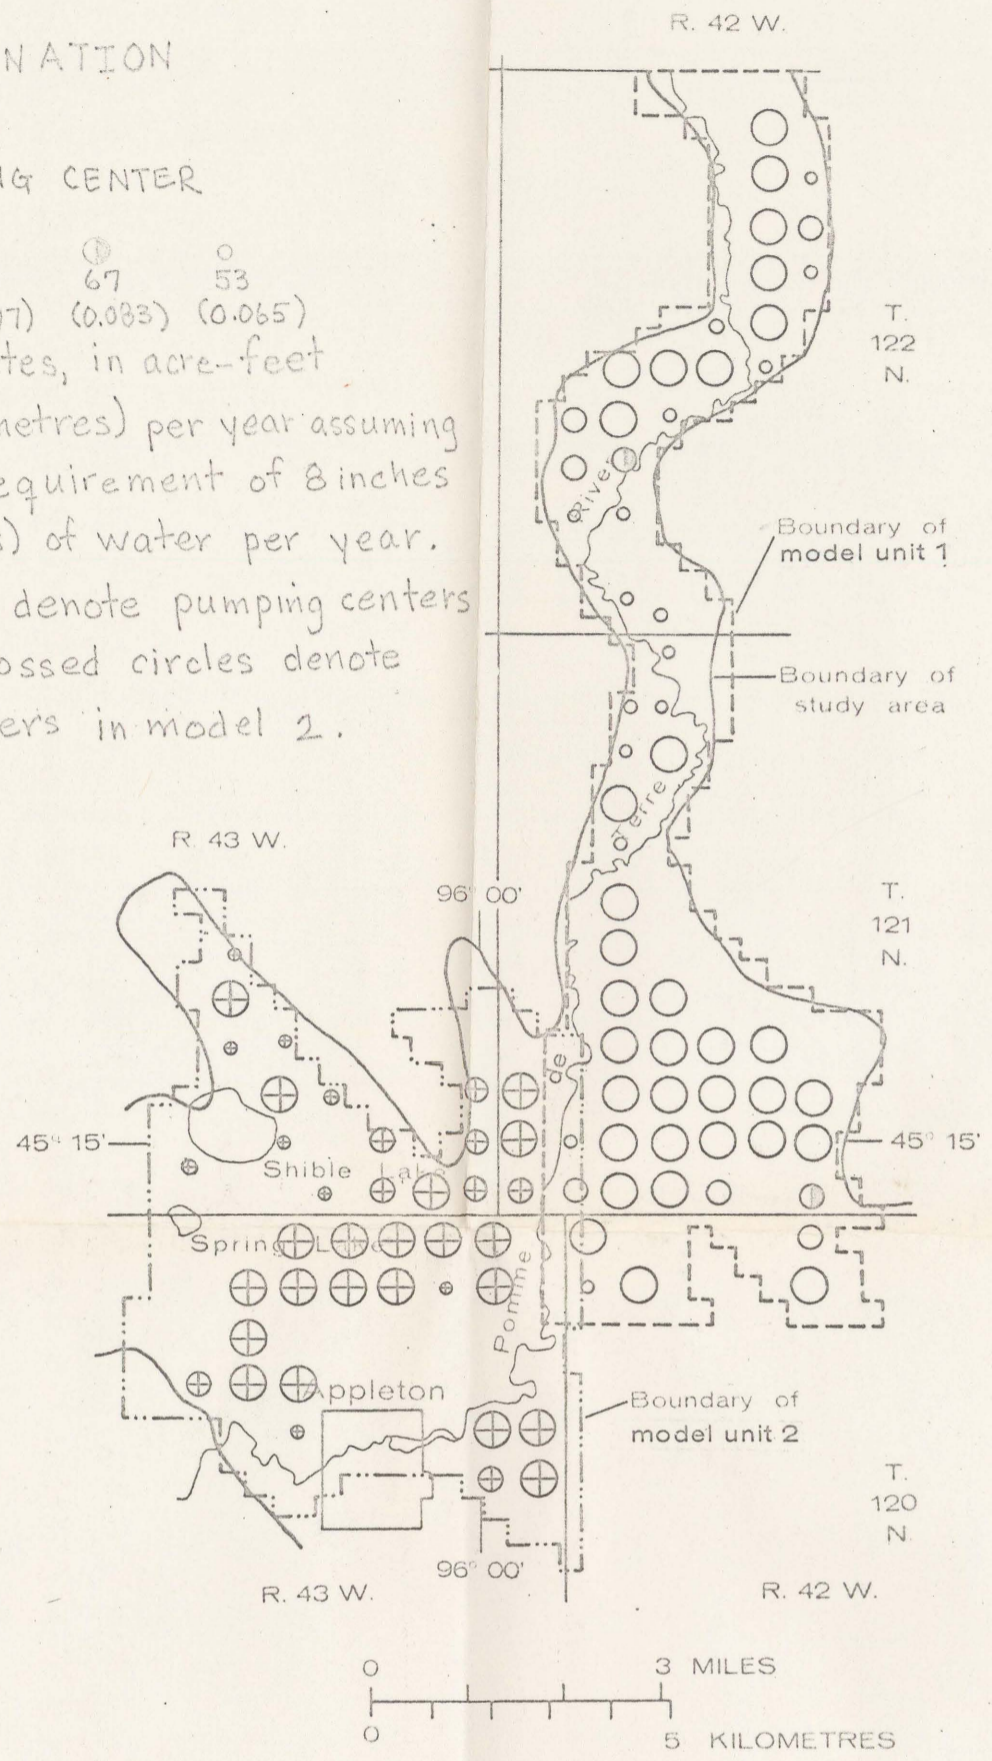

Figure 15.-- Locations and withdrawal rates of pumping centers for a maximum (hypothetical) development plan of the surficial outwash aquifer.
