Sections Monterey Quadrangle N. 155

120.200

H. M. Katcette

see Master Map sheet 12 for location of drainage
as shown on see 12th edition map.

Rate to cross-sections. Because of the rounded nature of many of the major faults, which also plunge northeast or northwest, fold axes generally strike the same direction as the east-west section A-A' E-E' in Figure 1, rather than plunging out along general trends as shown.
