

U.S. Geological Survey
 OPEN FILE REPORT 75-172
 This report is preliminary and has
 not been edited or reviewed for
 conformity with Geological Survey
 standards or nomenclature.

Thickness of surficial deposits exaggerated
 where reported less than 10 feet. Thickness
 of till (Qt) shown diagrammatically. Altitude
 of bedrock surface based on preliminary bed-
 rock-surface contours with 50 ft interval
 (W.E. Wilson, U.S.G.S., unpublished data). Dot-
 dash line shows approximate altitude of topset-
 foreset contact in deltaic deposits.

PROFILES OF GLACIOFLUVIAL DEPOSITS IN THE JEREMY BROOK-EIGHTMILE BROOK AREA

Maximum altitudes projected to line of
 profile, P-P'. Dashed lines show inferred
 gradients on deposits at time of deposition.

Connecticut (Southbury quad). Surficial. 1:24,000. 1975.
