

Base map compiled from Alabama Highway Department maps and field notes.

Prepared by J. R. Hanks
UNITED STATES GEOLOGICAL SURVEY
WATER RESOURCES DIVISION
in cooperation with the
GEOLOGICAL SURVEY OF ALABAMA
1971

77-453

Notes to reviewers:

Illustration will be redrafted for final publication by Geological Survey of Alabama.

7-day low flow color code will be changed to conform with color code used in other reports of this series.

Help to draftman:
The center points for average flow lines were
determined in 1967 of a reach since the
scale 1:62,500.

Average flow lines are to be scaled to planimetric
and bathymetric data. The lines are to be plotted
on a grid of 1:62,500 scale. The lines are to be
plotted on a grid of 1:62,500 scale.
