

EXPLANATION

 Magnetic contours
Showing total intensity magnetic field of the earth in gammas relative to arbitrary datum. Thickened to indicate closed areas of lower magnetic intensity. Dashed where data are incomplete. (Contour interval is 20 gammas)
Main magnetic field of earth for 1965, updated to 1974, removed (Fabiano and Peddie, 1969), 1,000 gammas added.

 Location of measured maximum or minimum intensity within closed high or closed low

 Flight path
Showing location and spacing of data
