

Residual gravity computed from the complete Bouguer anomaly, for an assumed density of 2.6 g/cc. The method of assuming the regional field removed and interpretation of anomalies are discussed in a U.S.G.S. Open-File Report (Isherwood, 1975).

# RESIDUAL GRAVITY MAP OF THE GEYSERS AREA, CALIFORNIA

by  
W. F. Isherwood  
Contour interval: 1mgal  
Scale 1:62500

This map is preliminary and has not been edited or reviewed for conformity to Geological Survey standards.

Gravity surveys for this map were made by R. H. Chapman (1962-1971), Donald Plouff (1973), and W. F. Isherwood (1974-1975).
