Grid from U.S. Geological Survey

Aeromagnetic survey flown and compiled  
by U.S. Geological Survey. Flown at  
11,500 feet barometric elevation, 1975

# EXPLANATION

Magnetic contours  
Showing total intensity magnetic field  
of the earth in gammas relative to  
arbitrary datum. Hachured to indicate  
closed areas of lower magnetic intensi-  
ty. Dashed where data are incomplete.  
This is a residual aeromagnetic map with  
International Geomagnetic Reference Field  
for 1965 (undated to 5/75) removed and  
1,000 gammas added. Contour interval 20 gamma.

Location of measured maximum or minimum  
intensity within closed high or closed  
low

Flight path  
Showing location and spacing of data
