

Location map

This map is a report map prepared as part of an investigative report on the hydrology of the Great Bend Prairie. The map has been compiled and revised in this format to provide the State agencies, the newly formed Big Bend National Monument, the newly formed Big Bend National Monument, and individuals with the information for use in management planning.

The map showing the configuration of the buried bedrock surface was prepared using data from 2,000 logs of test holes drilled for oil, gas, and water.

EXPLANATION

Bedrock outcrop area

Bedrock contour
Shows altitude of buried bedrock surface, dashed where inferred.
Contour interval 50 feet (15 metres).
Datum is mean sea level

MAP SHOWING CONFIGURATION OF BURIED BEDROCK SURFACE, GREAT BEND PRAIRIE, SOUTH-CENTRAL KANSAS
