

5000' Barometric | 3000' Barometric

EXPLANATION

Magnetic contours
Showing total intensity magnetic field of the earth in gammas relative to arbitrary datum. Main magnetic field of the earth (Fahnestock and Peddie, 1963) has been removed. Dashed lines indicate closed areas of lower magnetic intensity. Dashed where data are incomplete. Contour intervals are 10 and 100 gammas. Values shown are in hundreds of gammas.

Flown in a north-south flight direction with a spacing of one mile and a barometric flight elevation of either 2000 feet or 5000 feet.
